Jack A. Goldstone

Revolutions Theoretical Comparative And Historical Studies:

Revolutions Jack A. Goldstone, Robert King Merton, 1986 Revolutions Stephen K. Sanderson, 2015-12-03 This expanded updated edition of *Revolutions* offers a new chapter on terrorism and on social movements including jihadism. *Revolutions* and state breakdowns are the primary focus as Sanderson presents prominent theories and describes the process of revolutions. The book covers famous revolutions from history: France, Russia, China, and several social and political revolutions in the Third World: Cuba, Nicaragua, Iran, and the Philippines. Given the frequency of revolutionary movements, a key question addressed by the book is: Why are actual revolutions so rare? Sanderson also assesses the state breakdowns in Eastern Europe and the Soviet Union after 1989, the typical outcomes of revolutions, and the future of revolutions. An appendix presents biographical and autobiographical sketches of several of the most prominent scholars of revolutions.

Revolutions and Revolutionary Movements James DeFronzo, 2018-05-04 With crucial insights and indispensable information concerning modern day political upheavals, *Revolutions and Revolutionary Movements* provides a representative cross section of the most significant revolutions of the twentieth and twenty-first centuries. This Fifth Edition is revised and updated with a new chapter on the Arab Revolution from its beginning in December 2010 to the present. In this widely used text, students can trace the historical development of eleven revolutions using a five-factor analytical framework. Author James DeFronzo clearly explains all relevant concepts and events, the roles of key leaders, and the interrelation of each revolutionary movement with international economic and political developments and conflicts, including World Wars I and II, the Cold War, and the War on Terror. Student resources include multiple orienting maps, summary and analysis sections, suggested readings, chronologies, and documentary resources.

Revolutions Paul Caringella, Glenn Hughes, 2013-02-21 *Revolutions Finished and Unfinished: From Primal to Final* is an important philosophical contribution to the study of revolution. It not only makes new contributions to the study of particular revolutions but to developing a philosophy of revolution itself. Many of the contributors have been inspired by the philosophical approaches of Eric Voegelin or Eugen Rosenstock-Huussy, and the tension between these two social philosophies adds to the philosophical uniqueness and richness of the work.

Revolutions and the Collapse of Monarchy Zhand Shakibi, 2007-02-23 What causes revolution? What brought about the end of the last major monarchies of the modern period: Louis XVI, Nicholas II, and Mohammad Reza Pahlavi? Were they the unwitting victims of historical circumstance, or did their own actions help to bring about the revolutions that overthrew them? This powerful and original book is the first comparative study of the revolutions in Bourbon France, Romanov Russia, and Pahlavi Iran. Zhand Shakibi analyses fully the timing and causes of these three revolutions and reveals the important similarities between them. *Revolutions and the Collapse of Monarchy* argues provocatively that it is often the monarch's own personality that provides the vital spark which produces revolution. This ambitious and important book challenges the Marxist interpretation of history and adds a compelling new perspective to theories of revolution.

Revolution and the

Millennium James F. Rinehart, 1997-10-30 An interdisciplinary cross cultural cross historical analysis of three 20th century non Western revolutionary societies China Mexico and Iran that were profoundly impinged upon by European and American imperialism The study explores the role of apocalyptic beliefs in radical movements bent on sociopolitical transformation It concludes that millennial expectations performed important and similar preparatory leadership and therapeutic functions in each case Millenarian movements are powerful and emotional social movements that expect an immediate collective total this worldly supernatural salvation and transformation of society They anticipate the complete destruction of the existing sociopolitical and economic order which they assert will be followed by a new and perfect society This study provides an interdisciplinary cross cultural cross historical analysis of three 20th century non Western revolutionary societies that were profoundly impinged upon by European and American imperialism It seeks to explore the functional role of millenarianism in these three revolutions In all three cases millenarianism prepared the way for revolutionary transformation It acted as a catalyst for action among that group of the most ardent revolutionists who were willing to pay any price to achieve what they were convinced was the inevitable goal of a utopian society Millenarianism created the potential for charismatic leadership to emerge It functioned as a doctrinal platform that awaited the opportunity to elevate a prophetic revolutionary leader to take control Finally millenarianism performed a therapeutic identity and cathartic function by providing the doctrinal foundation and an effective organization for a social healing process to take place A challenge to conventional arguments on the origins and outcomes of revolutions this study will be of great interest to scholars and researchers in comparative politics sociology and religion

Handbook of Revolutions in the 21st Century Jack A. Goldstone, Leonid Grinin, Andrey

Korotayev, 2022-05-19 The 21st century has witnessed a considerable and increasing number of political revolutions around the world This contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires Instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject This handbook offers a comparative perspective on the new wave of revolutions of the last decade Presenting case studies on the color revolutions the Arab revolutions of 2010 2011 and the global wave of revolutions in 2013 2018 that spanned regions ranging from Africa to the Caucasus it offers a better understanding of the varied forms features and historical backgrounds of revolutions as well as their causes Accordingly it highlights recent revolutions in their historical and world systems contexts The handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution The second part analyzes revolutions within long term historical trends and in their world system contexts In turn the third part explores specific major revolutionary waves in history The fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the Arab Spring 2010 2013 as an important turning point The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that

began in 2018 The seventh and final part offers forecasts on the future of revolutions Given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence Once again this volume demonstrates the kind of open minded systematic analysis that the field of revolutionary studies requires Prof George Lawson Department of International Relations Australian National University Canberra

Theorizing Revolutions John Foran, 2003-09-02 In Theorizing Revolutions some of the most exciting thinkers in the study of revolutions today look critically at the many theoretical frameworks through which revolutions can be understood and apply them to specific revolutionary cases The theoretical approaches considered in this way include state centred perspectives structural theory world system analysis elite models demographic theories and feminism and the revolutions covered range in time from the French Revolution to Eastern Europe in 1989 and in place from Russia to Vietnam and Nicaragua

Revolution, Rebellion, Resistance Professor Eric Selbin, 2013-04-04 Why do revolutions happen Decades of social science research have brought us little closer to understanding where when and amongst whom they occur In this groundbreaking book Eric Selbin argues that we need to look beyond the economic political and social structural conditions to the thoughts and feelings of the people who make revolutions In particular he argues we need to understand the stories people relay and rework of past injustices and struggles as they struggle in the present towards a better future Ranging from the French Revolution to the Battle for Seattle via Russia China Cuba Vietnam and Nicaragua Selbin makes the case that it is myth memory and mimesis which create maintain and extend such stories Revolution Rebellion Resistance identifies four kinds of enduring revolutionary story Civilizing and Democratizing The Social Revolution Freedom and Liberation and The Lost and Forgotten which do more than report on events they catalyse changing the world

Revolution and Rebellion in the Early Modern World Jack A. Goldstone, 1991-04-02 What can the great crises of the past teach us about contemporary revolutions Arguing from an exciting and original perspective Goldstone suggests that great revolutions were the product of ecological crises that occurred when inflexible political economic and social institutions were overwhelmed by the cumulative pressure of population growth on limited available resources Moreover he contends that the causes of the great revolutions of Europe the English and French revolutions were similar to those of the great rebellions of Asia which shattered dynasties in Ottoman Turkey China and Japan The author observes that revolutions and rebellions have more often produced a crushing state orthodoxy than liberal institutions leading to the conclusion that perhaps it is vain to expect revolution to bring democracy and economic progress Instead contends Goldstone the path to these goals must begin with respect for individual liberty rather than authoritarian movements of national liberation Arguing that the threat of revolution is still with us Goldstone urges us to heed the lessons of the past He sees in the United States a repetition of the behavior patterns that have led to internal decay and international decline in the past a situation calling for new leadership and careful attention to the balance

between our consumption and our resources Meticulously researched forcefully argued and strikingly original *Revolutions and Rebellions in the Early Modern World* is a tour de force by a brilliant young scholar It is a book that will surely engender much discussion and debate
