A Pocket Guide to Risk Assessment and Management in Mental Health

Chris Hart, 2023-12-19 Risk assessment and risk management are top of every mental health organisation's agenda

This updated and expanded new edition provides an informative and practical guide to the process of undertaking a risk assessment arriving at a risk formulation and developing a risk management plan. Covering everything a practitioner may have to think about when undertaking risk assessments in an accessible logical form, the second edition of *A Pocket Guide to Risk Assessment and Management in Mental Health* includes new and expanded content on risk formulation working in forensic settings, specific mental health disorders, models of suicide and self-harm and triage. It features practice recommendations rooted in the latest theory and evidence, base clinical tip boxes, tables, diagrams and case examples along with samples of authentic dialogue which demonstrate ways to formulate questions and think about complex problems with the person being assessed. A series of accompanying videos professionally made and based on actual case studies are available on a companion website further illustrating key risk assessment and management skills. This concise guidebook is designed for all mental health professionals and professionals in training. It will also be a useful reference for all healthcare practitioners who regularly come into contact with people experiencing mental health problems.

Guide to Reference in Medicine and Health Christa Modschiedler, Denise Beaubien Bennett, 2014-04-26 Drawn from the extensive database of *Guide to Reference*, this up-to-date resource provides an annotated list of print and electronic biomedical and health-related reference sources including internet resources and digital image collections. Readers will find relevant research, clinical and consumer health information resources in such areas as Medicine, Psychiatry, Bioethics, Consumer health and health care, Pharmacology and pharmaceutical sciences, Dentistry, Public health, Medical jurisprudence, International and global health. *Guide to Reference* entries are selected and annotated by an editorial team of top reference librarians and are used internationally as a go-to source for identifying information as well as training reference professionals. Library staff answering health queries as well as library users undertaking research on their own will find this an invaluable resource.

Telemental Health Kathleen Myers, Carolyn Turvey, 2012-09-20 Acquiring access to mental health treatments can be difficult for those who are not near mental health facilities. The growing field of telemental health addresses this problem by using video and telephone conferencing to provide patients with access to psychiatric professionals. However, the process faces challenges to gain adoption into mainstream medical practice and to develop an evidence base supporting its efficacy. In this comprehensive text, leading professionals in the field provide an introduction to telemental health and explore how to construct a therapeutic space in different contexts when conducting telemental health, how to improve access for special populations and how to develop an evidence base and best practice in telemental health. In the past 15 years, implementation of telemental health has seemed to follow more from need than from demonstrated efficacy. The thorough and insightful chapters within this book show the importance of continued research and thoughtful development of ethical and responsible

practice that is needed in the field and begin to lay out steps in constructing this process Telemental Health will be an essential book for all clinical practitioners and researchers in mental health fields Information in this book is focused on the clinical practice of telemental health no other text is similarly oriented to clinical practice Limited options for interested audience makes this text a top choice The Editors are experienced in multiple aspects of e health across diverse clinical settings and the authors are national leaders who are most knowledgeable regarding developments in the field Emphasis is on providing evidence based care and telemental health emerges as comparable to usual care not a second best option material is not esoteric but relevant to clinical practice Readers will be able to readily find the equipment and other technology to establish their practice
