Apprendre et faire apprendre Étienne Bourgeois, Gaëtane Chapelle, 2015-01-01 T00:00:00+01:00 La psychologie scientifique peut-elle aider les enseignants et formateurs du XXI^e siècle ? Les auteurs de cet ouvrage sont unanimes pour répondre que la science ne peut répondre toutes les interrogations mais peut aider à identifier les conditions nécessaires pour apprendre et faire apprendre. On ne parle plus en effet d'apprentissage mais de faire apprendre, ce qui sous-entend une implication de l'apprenant lui-même mais aussi de celui qui transmet les connaissances et les compétences. Cet ouvrage pluridisciplinaire est fondé sur les travaux les plus récents dans différents pays francophones.

Les 100 mots de l'éducation Agnès van Zanten, Patrick Rayou, 2018-08-29 T00:00:00+02:00 Enfant, étudiant, parent, enseignant, décideur, chacun est concerné par les questions d'éducation. Celles-ci font l'objet d'analyses multiples et croisées de la part de philosophes, d'historiens, de sociologues, de psychologues, de didacticiens mais aussi de praticiens. Cet ouvrage rassemble ces diverses approches autour de 100 mots clés et propose ainsi une synthèse des connaissances dans le champ éducatif. Des notions récentes : Communauté éducative, aux sujets coutumiers de nos rentrée : Autorité, Redoublement, des débats les plus vifs aux questions plus consensuelles, ce livre brosse ainsi un panorama de l'éducation aujourd'hui de ses questionnements comme de ses savoirs acquis, de ses acteurs, de ses méthodes et des nouveaux champs de recherches qui se développent sur ce sujet.

L'école peut-elle être juste et efficace ? : De l'égalité des chances à l'égalité des acquis Marcel Crahay, 2013-09-12 Après une réflexion critique sur le concept d'équité en matière d'éducation, l'ouvrage s'attache à un bilan des recherches sociologiques et pédagogiques afin de cerner les acquis importants et d'identifier les champs d'incertitude et d'ignorance. L'école reste le siège de nombreuses inégalités. Pourtant, il est possible de bâtir une école qui vise l'égalité des acquis de base pour une grande majorité. Après une réflexion critique sur le concept d'équité en matière d'éducation, l'ouvrage s'attache à un large bilan des recherches sociologiques et pédagogiques entreprises dans le domaine afin de cerner les acquis, les manifestations importantes et d'identifier les champs d'incertitude ou d'ignorance encore en place. Par rapport à l'édition précédente, plusieurs chapitres ont été totalement remaniés, les autres complétés. Pour ce faire, l'auteur s'est entouré d'une équipe de collaborateurs, chacun expert dans un domaine spécifique : C. Buchs, G. Felouzis, D. Lafontaine, K. Lehraus, Ch. Monseur et Ph. Wanlin. Les enseignants mais aussi les décideurs politiques trouveront ici les bases scientifiques indispensables à leur action. Les chercheurs découvriront des pistes de recherche à explorer afin de faire progresser le champ des connaissances utiles à la pratique.
