Dan Miller

Psychology Library Editions Cognitive Science Homesickness Cognition And Health Volume 1:

The Child in the Physical Environment Christopher Spencer, Mark Blades, Kim Morsley, 1989-04-24 Presents a developmental approach to children and their understanding of space and spatial relationships Traces development from the earliest concepts of the self in space through the location of objects to movement through the immediate area route and landmark learning and the development of images of distant places Also covers applied topics includes a detailed chapter on the special problems of blind children and techniques for working with them *Massachusetts General Hospital Comprehensive Clinical Psychiatry - E-BOOK* Theodore A. Stern, Timothy E. Wilens, Maurizio Fava, 2024-03-06 The Massachusetts General Hospital is widely regarded as one of the world's premier psychiatric institutions Massachusetts General Hospital Comprehensive Clinical Psychiatry 3rd Edition offers practical informative and hands on advice from the staff of the esteemed MGH Department of Psychiatry helping you put today's best practices to work for your patients This authoritative reference covers a wide variety of clinical syndromes and settings aided by superb graphics throughout In one convenient volume you'll have easy access to the answers you need to face and overcome any clinical challenge Uses a reader friendly and highly templated format with abundant boxed summaries bulleted points case histories algorithms references and suggested readings Contains new chapters on the Psychiatric Management of Patients with Cardiac Renal Pulmonary and Gastrointestinal Disease COVID 19 Infection Burns Trauma and Intensive Care Unit Treatment Care of LGBTQ Patients and Mindfulness and Resilience Covers key areas such as Substance Use Disorders Mood Anxiety and Psychotic Disorders Emergency Psychiatry Functional Neuroanatomy and the Neurologic Examination Psychological and Neuropsychological Assessment Military Psychiatry Psychiatric Manifestations of Traumatic Brain Injury Legal and Ethical Issues in Psychiatry End of Life Care and Approaches to Collaborative Care and Primary Care Psychiatry Features key points for every chapter updated DSM 5 criteria and enhanced content on collaborative care and behavioral medicine ensuring that your knowledge is thorough and up to date Corresponds to the companion review volume Massachusetts General Hospital Study Guide for Psychiatry Exams 2nd Edition ISBN 978 0 443 11983 5 Any additional digital ancillary content may publish up to 6 weeks following the publication date **Forthcoming Books** Rose Arny, 2003 [Books In Print 2004-2005](#) Ed Bowker Staff, Staff Bowker, Ed, 2004 *Encyclopedia of Mental Health*, 2015-08-26 Encyclopedia of Mental Health Second Edition Four Volume Set tackles the subject of mental health arguably one of the biggest issues facing modern society The book presents a comprehensive overview of the many genetic neurological social and psychological factors that affect mental health also describing the impact of mental health on the individual and society and illustrating the factors that aid positive mental health The book contains 245 peer reviewed articles written by more than 250 expert authors and provides essential material on assessment theories of personality specific disorders therapies forensic issues ethics and cross cultural and sociological aspects Both professionals and libraries will find this timely work indispensable Provides fully up to date

descriptions of the neurological social genetic and psychological factors that affect the individual and society Contains more than 240 articles written by domain experts in the field Written in an accessible style using terms that an educated layperson can understand Of interest to public as well as research libraries with coverage of many important topics including marital health divorce couples therapy fathers child custody day care and day care providers extended families and family therapy

Mind Your Mood Dan Miller, 2015-10-10 Cognitive therapy has gained massive acceptance among mental health professionals as well as the public As a matter of fact cognitive therapy has become one of the most practiced and researched forms of psychotherapy in the entire universe There are a number of reasons that explain this growing interest One of them stems from the fact that cognitive therapy consists of basic down to earth ideas that are intuitive and appealing Secondly research studies have confirmed cognitive therapy to be very critical for individuals suffering from anxiety and depression among other problems Thirdly lots of self help books have aroused a strong and popular demand for cognitive therapy not only in the United States but also the entire world Cognition refers to a perception or thought In other words cognitions describe the way you think about events or things at any particular moment The thoughts go through your mind automatically without much control from your end This has a huge impact on how you generally feel For instance people read self help books on various subjects because of their thoughts and feelings If they feel depressed and discouraged they may pick an inspirational book to lift their moods Your feelings are a sum total of the messages you give yourself If you think of yourself as a loser or a useless person those thoughts will compound to form a feeling which is mapped onto your behavioral pattern Close to 2000 years ago Epictetus a Greek philosopher stated that people are oftentimes disturbed not by things but rather by the views we take of them In the Bible the book of Proverbs 23 7 states that For as he thinks within himself so he is Shakespeare in Hamlet Act 2 and Scene 2 expresses a similar idea and says For there is nothing either good or bad but thinking makes it so The idea of how thinking commands your mood has been around for quite some time but many depressed people do not really understand it When you are depressed you may falsely think that the bad things that have happened to you are the cause of it You may feel inferior and destined to be unhappy because someone you love rejected you or you failed in your work Even though no single treatment will ever be an ultimate solution cognitive therapy has been shown by research studies to be effective in dealing with a number of disorders including depression This book explores the mind and how changing your moods can change your life

Psychological Aspects of Geographical Moves Miranda van Tilburg, Ad Vingerhoets, 2007-04 Mobility of mankind has increased enormously in the past few decades People leave their homes and native countries for business and study for vacation or to flee from unsafe conditions like wars and natural disasters In all cases the sojourner faces a dual challenge of breaking with the familiar home environment and adjusting to new surroundings This book deals with the psychological and health consequences of leaving the familiar home and the process of creating a new one The focus is mainly on acculturation stress and homesickness which both are relevant to those

who travel Acculturation refers to the process and outcome of a person's encounter with and adaptation to a culturally new and different environment Homesickness is defined as a depression like reaction to leaving one's home The contributions in this book present empirical data as well as theoretical and conceptual discussions Causes consequences moderating variables and theoretical explanations are discussed Both short term e.g. vacations and long term e.g. immigration separations from home receive attention By combining these different but related topics this book provides a valuable overview for researchers teachers students and professionals working with people who present with problems related to migration or traveling

Thinking, Fast and Slow Daniel Kahneman, 2011-11-03 One of the most influential books of the 21st century the ground breaking psychology classic over 10 million copies sold that changed the way we think about thinking There have been many good books on human rationality and irrationality but only one masterpiece That masterpiece is Thinking Fast and Slow Financial Times A lifetime's worth of wisdom Steven D Levitt co author of Freakonomics Why do we make the decisions we do Nobel Prize winner Daniel Kahneman revolutionised our understanding of human behaviour with Thinking Fast and Slow Distilling his life's work Kahneman showed that there are two ways we make choices fast intuitive thinking and slow rational thinking His book reveals how our minds are tripped up by error bias and prejudice even when we think we are being logical and gives practical techniques that enable us all to improve our decision making This profound exploration of the marvels and limitations of the human mind has had a lasting impact on how we see ourselves The godfather of behavioural science his steely analysis of the human mind and its many flaws remains perhaps the most useful guide to remaining sane and steady Sunday Times

The Universe Within Morton M. Hunt, 1982
