Samaras, 2015-10-30 Polyvocal Professional Learning through Self Study Research illustrates the power of we for innovative and authentic professional learning The 33 contributors to this book include experienced and emerging self study researchers writing in collaboration across multiple professions academic disciplines contexts and continents These authors have noted and reviewed each other s chapters and adapted their contributions to generate a

polyvocal conversation that significantly advances scholarship on professional learning through self study research Building on and extending the existing body of work on self study research the book offers an extensive and in depth scholarly exploration of the how why and impact of professional learning through context specific practitioner led inquiry The chapters illustrate polyvocal professional learning as both phenomenon and method with the original research that is presented in every chapter adding to the forms of methodological inventiveness that have been developed and documented within the self study research community This unique book represents an inspiring step forward in self study research Authors from various continents provide evidence of how the I can be strengthened through the we perspective showing convincingly how polyvocality transdisciplinarity and an intercultural approach deepen professional learning This powerful book offers important new insights for the methodology of self study with an impact beyond teachers and teacher educators Fred A J Korthagen Professor Emeritus at Utrecht University The Netherlands A fascinating set of chapters illustrate the importance of many lenses and many voices when studying one s practice Each chapter testifies that self study and its ties to improvement through posing thoughtful questions collecting and analyzing relevant data and interrogating the interpretation of one s analysis of self are global and cross disciplinary This book is a must read Ren e T Clift Professor and Associate Dean University of Arizona USA

Origin and Evolution of the Cape Mountains and Karoo Basin Bastien Linol, Maarten J. de Wit, 2016-09-03 This book describes the latest research on the geological geochemical geochronological biological and geomorphic evolution of the unique and relatively pristine landscape of the Cape Mountains and the Karoo Basin a region in South Africa that is currently being targeted for shale gas exploration and development With up to date graphics maps drill core and seismic data it offers the latest observations and synthesis and highlights areas of ongoing research The work presented also considers a wider connection of the Cape Karoo system to other basins in Central Gondwana including South America thus following in the footsteps of A L du Toit Clearly there is still much to be learned before shale gas development can be considered and this book provides some timely perspectives

Human-Centered Software Engineering - Integrating Usability in the Software Development Lifecycle Ahmed Seffah, Jan Gulliksen, Michel C. Desmarais, 2006-06-26 Human Centered Software Engineering Bridging HCI Usability and Software Engineering From its beginning in the 1980 s the eld of human computer interaction HCI has been a multidisciplinary arena By this I mean that there has been an explicit recognition that distinct skills and perspectives are required to make the whole effort of designing usable computer systems work well Thus people with backgrounds in Computer Science CS and Software Engineering SE joined with people with backgrounds in various behavioral science disciplines e g cognitive and social psychology anthropology in an effort where all perspectives were seen as essential to creating usable systems But while the eld of HCI brings individuals with many background disciplines together to discuss a common goal the development of useful usable satisfying systems the form of the collaboration remains unclear Are we striving to coordinate the varied activities in system development or are we

seeking a richer collaborative framework In coordination Usability and SE skills can remain quite distinct and while the activities of each group might be critical to the success of a project we need only insure that critical results are provided at appropriate points in the development cycle Communication by one group to the other during an activity might be seen as only minimally necessary In collaboration there is a sense that each group can learn something about its own methods and processes through a close partnership with the other Communication during the process of gathering information from target users of a system by usability professionals would not be seen as so thing that gets in the way of the essential work of software engineering professionals
