Proximization The Pragmatics Of Symbolic Distance Crossing Pragmatics Beyond New Series:

Proximization Piotr Cap, 2013-06-15 This book proposes a new theory proximization theory in the area of political public legitimization discourse Located at the intersection of Pragmatics Cognitive Linguistics and critical approaches the theory holds that legitimization of broadly consequential political public policies such as pre emptive interventionist campaigns is best accomplished by forced construals of virtual external threats encroaching upon the speaker and her audience s home territory The construals which proceed along spatial temporal and axiological lines are forced by strategic deployment of lexico grammatical choices drawn from the three domains This proposal is illustrated primarily in the in depth analysis of the 2001 2010 US discourse of the War on Terror and secondarily in a number of pilot studies pointing to a wide range of further applications environmental discourse health communication cyber threat discourse political party representation The theory and the empirical focus of the book will appeal to researchers working on interdisciplinary projects in Pragmatics Semantics Cognitive Linguistics Critical Discourse Studies as well as Journalism and Media Studies
