Designing Software Architectures Humberto Cervantes, Rick Kazman, 2016-04-29 Designing Software Architectures will teach you how to design any software architecture in a systematic predictable repeatable and cost effective way This book introduces a practical methodology for architecture design that any professional software engineer can use provides structured methods supported by reusable chunks of design knowledge and includes rich case studies that demonstrate how to use the methods Using realistic examples you will master the powerful new version of the proven Attribute Driven Design ADD 3.0 method and will learn how to use it to address key drivers including quality attributes such as modifiability usability and availability along with functional requirements and architectural concerns Drawing on their extensive experience Humberto Cervantes and Rick Kazman guide you through crafting practical designs that support the full software life cycle from requirements to maintenance and evolution You will learn how to successfully integrate design in your organizational context and how to design systems that will be built with agile methods Comprehensive coverage includes Understanding what architecture design involves and where it fits in the full software development life cycle Mastering core design concepts principles and processes Understanding how to perform the steps of the ADD method Scaling design and analysis up or down including design for pre sale processes or lightweight architecture reviews Recognizing and optimizing critical relationships between analysis and design Utilizing proven reusable design primitives and adapting them to specific problems and contexts Solving design problems in new domains such as cloud mobile or big data

Design and Construction of an RFID-enabled Infrastructure Nagabhushana Prabhu, 2013-11-20 Internet 2.0 previously called the Internet of Things presents a tantalizing vision of bridging the cyber and physical worlds to forge a seamless planet wide infrastructure in which cyber resources and physical objects can interact without human intervention The technology needed to build the infrastructure already exists However more than a decade after the vision of Internet 2.0 was articulated it remains largely unrealized except in isolated settings Following a background discussion Design and Construction of an RFID enabled Infrastructure the Next Avatar of the Internet addresses three questions what are the barriers to the emergence of Internet 2.0 as a global infrastructure What are the features that Internet 2.0 architecture must have if it is to become a successful global infrastructure How can one build a prototype of Internet 2.0 The quest for answers to the above questions threads the narrative through the birthing process and maturation of two successful global infrastructures the Internet and the web Based on a review of the design philosophies underlying the Internet and the Web their histories and the strategic stewardship that midwived their births the

book presents the architectural guidelines for the Internet 2.0 infrastructure as well as a blueprint for the construction of its prototype. The discussion in the book is consolidated into a list of technical and strategic guidelines intended to facilitate the incubation of Internet 2.0.

Software Engineering Research, Management and Applications 2011 Roger Lee, 2011-11-06. The purpose of the 9th International Conference on Software Engineering Research Management and Applications SERA 2011 held on August 10-12, 2011 in Baltimore, Maryland, was to bring together scientists, engineers, computer users, and students to share their experiences and exchange new ideas and research results about all aspects of theory, applications, and tools of computer and information sciences and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected 12 outstanding papers from SERA 2011, all of which you will find in this volume of Springer's Studies in Computational Intelligence.

Reuse in Emerging Software Engineering Practices Sihem Ben Sassi, Stéphane Ducasse, Hafedh Mili, 2020-11-30. This book constitutes the proceedings of the 19th International Conference on Software and Systems Reuse ICSR 2020 held in Hammamet, Tunisia, in December 2020. Due to the COVID-19 pandemic, the Conference was held virtually. The 16 full papers and 2 short papers included in this book were carefully reviewed and selected from 60 submissions. The papers were organized in topical sections named: modelling reuse in practice, reengineering, recommendation, and empirical analysis.

Microsoft Azure Architect Technologies and Design Complete Study Guide Benjamin Perkins, William Panek, 2021-01-13. Become a proficient Microsoft Azure solutions architect. Azure certifications are critical to the millions of IT professionals. Microsoft has certified as MCSE and MCSA in Windows Server in the last 20 years. All of these professionals need to certify in key Azure exams to stay current and advance in their careers. Exams AZ-303 and AZ-304 are the key solutions architect exams that experienced Windows professionals will find most useful at the intermediate and advanced points of their careers. *Microsoft Azure Architect Technologies and Design Complete Study Guide* Exams AZ-303 and AZ-304 covers the two critical Microsoft Azure exams that intermediate and advanced Microsoft IT professionals will need to show proficiency as their organizations move to the Azure cloud. Understand Azure. Set up your Microsoft Cloud network. Solve real-world problems. Get the confidence to pass the exam. By learning all of these things plus using the Study Guide review questions and practice exams, the reader will be ready to take the exam and perform the job with confidence.

Advances in Network Security and Applications David C. Wyld, Michal Wozniak, Nabendu Chaki, Natarajan Meghanathan, Dhinaharan Nagamalai, 2011-06-30. This book constitutes the proceedings of the 4th International Conference on Network Security and Applications held in Chennai, India, in July 2011. The 63 revised full papers presented were carefully reviewed and selected from numerous submissions. The papers address all technical and practical aspects of security and its applications for wired and wireless networks and are organized in topical sections on network security and applications, ad hoc sensor and ubiquitous computing, as well as peer-to-peer networks and trust management.
