

Microsoft® SQL Server® 2008 R2

MICROSOFT® SQL SERVER® 2008 R2 ENTERPRISE FOR MID-MARKET ORGANIZATIONS

SQL Server 2008 R2 Enterprise helps to significantly reduce data management operational costs, maintain high availability and scalability, and makes it easier for employees to obtain maximum business insight from data.

Business Intelligence

Gain business advantage through pervasive insight with enterprise-level business intelligence (BI) capabilities.

Centralize reporting and data analysis

Reduce redundancy and improve business efficiency by creating a single, consolidated data store for business analytics and reporting. SQL Server 2008 R2 Enterprise provides a highly scalable data platform with performance-enhancing features that make it a cost-effective way for small to medium enterprises to consolidate their various sources of business data into a central data mart or data warehouse. Microsoft's Fast Track program provides tested server configurations that make it much easier and less expensive to build your data warehouse than you may imagine.

Gain efficiencies through improved business insight

Improve business decision-making and increase revenue through better insights. Use Master Data Management to clean and standardize data for analysis. Analyze business data from multiple sources, identify trends, and deliver reports and insights to your executives and employees. Empower employees by putting the tools they need to make critical business decisions directly into their hands. PowerPivot® for Excel® 2010 enables you to perform complex analyses without the need for deep technical knowledge, and you can share and manage analyses and reports centrally through PowerPivot for SharePoint® 2010.

Maximize your return on investment (ROI) through platform interoperability and compatibility

Benefit from close integration with common applications and platforms, such as Microsoft Office Excel and Microsoft Office SharePoint Server. This enables you to get more value from your existing applications and gain business efficiencies through an integrated user experience.

Productivity

Optimize your business with a more productive platform for data applications.

Increase business continuity

Reduce lost productivity by minimizing planned and unplanned database downtime. SQL Server 2008 R2 Enterprise provides enterprise-class high-availability capabilities, enabling you to implement cost-effective automatic failover solutions for physical and virtual servers to ensure that your business can continue to operate in the event of a database server failure. Additionally, SQL Server 2008 R2 Enterprise enables many maintenance tasks to be performed without taking the server offline to help to keep your business-critical applications available more of the time.

SQL Server provides us with exceptional dependability.
Bwin¹

Optimize business processes with high performance and scalability

Optimize the efficiency of your business through greater performance and scalability. SQL Server 2008 R2 enables you to dramatically improve the performance of line-of-business (LOB) applications and customer-facing Web applications, resulting in greater productivity.

Our testing demonstrates that SQL Server 2008 provides enterprise-class performance with a low total cost of ownership.
Siemens²

Reduce compliance and security costs with enterprise security

Security features in SQL Server 2008 R2 Enterprise enable you to protect sensitive data without using custom encryption solutions or expensive third-party data encryption packages. You can also take advantage of fine-grained auditing support to simplify data access logging and compliance in your organization.

Increase DBA productivity with enterprise manageability

SQL Server 2008 R2 features Application and Multi-Server Management, which makes it easier to centrally manage multiple registered database servers through an intuitive
