Migration A World History New Oxford World:

Migration Michael H. Fisher, 2014-01 Fisher explores the process of migration chronologically and at levels varying from the migration of an individual community to larger patterns of the collective movements of major ethnic groups to the more abstract study of emigration migration and immigration The New Oxford World History Michael Herbert Fisher, 2014

Migration in World History Patrick Manning, Tiffany Trimmer, 2020-05-04 In this third edition of *Migration in World History* Patrick Manning presents an expanded and newly coherent view of migratory processes conveying new research and interpretation The engaging narrative shows the continuity of migratory processes from the time of foragers who settled the earth to farmers opening new fields and merchants linking purchasers everywhere In the last thousand years accumulation of wealth brought capitalism industry and the travels of free and slave migrants In a contest of civilizational hierarchy and movements of emancipation nations arose to replace empires although conflicts within nations expelled refugees The future of migration is now a serious concern The new edition includes An introduction to the migration theories that explain the shifting patterns of migration in early and recent times Quantification of changes in migration including international migration domestic urbanization and growing refugee movements A new chapter tracing twenty first century migration and population from 2000 to 2050 showing how migrants escaping climate change will steadily outnumber refugees from other social conflicts While migration is often stressful it contributes to diversity exchanges new perspectives and innovations This comprehensive and up to date view of migration will stimulate readers with interests in many fields Migration and the Making of Global Christianity Jehu J. Hanciles, 2021-03-16 A magisterial sweep through 1500 years of Christian history with a groundbreaking focus on the missionary role of migrants in its spread Human migration has long been identified as a driving force of historical change Building on this understanding Jehu Hanciles surveys the history of Christianity's global expansion from its origins through 1500 CE to show how migration more than official missionary activity or imperial designs played a vital role in making Christianity the world's largest religion Church history has tended to place a premium on political power and institutional forms thus portraying Christianity as a religion disseminated through official representatives of church and state But as Hanciles illustrates this top down perspective overlooks the multifarious array of social movements cultural processes ordinary experiences and non elite activities and decisions that contribute immensely to religious encounter and exchange Hanciles's socio historical approach to understanding the growth of Christianity as a world religion disrupts the narrative of Western preeminence while honoring and making sense of the diversity of religious expression that has characterized the world Christian movement for two millennia In turning the focus of the story away from powerful empires and heroic missionaries *Migration and the Making of Global Christianity* instead tells the more truthful story of how every Christian migrant is a vessel for the spread of the Christian faith in our deeply interconnected world The Oxford World History of Empire Peter Fibiger Bang, Christopher Alan Bayly, Walter Scheidel, 2021 This is the first world history of empire

reaching from the third millennium BCE to the present By combining synthetic surveys thematic comparative essays and numerous chapters on specific empires its two volumes provide unparalleled coverage of imperialism throughout history and across continents from Asia to Europe and from Africa to the Americas Only a few decades ago empire was believed to be a thing of the past now it is clear that it has been and remains one of the most enduring forms of political organization and power We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods such as the relatively short age of European colonialism The history of empire as these volumes amply demonstrate needs to be drawn on the much broader canvas of global history Volume I The Imperial Experience is dedicated to synthesis and comparison Following a comprehensive theoretical survey and bold world history synthesis fifteen chapters analyze and explore the multifaceted experience of empire across cultures and through the ages The broad range of perspectives includes scale world systems and geopolitics military organization political economy and elite formation monumental display law mapping and registering religion literature the politics of difference resistance energy transfers ecology memories and the decline of empires This broad set of topics is united by the central theme of power examined under four headings systems of power cultures of power disparities of power and memory and decline Taken together these chapters offer a comprehensive and unique view of the imperial experience in world history Migration History in World
