Computational Econometrics Charles G. Renfro, 2004 This publication contains a substantial amount of detail about the broad history of the development of econometric software based on the personal recollections of many people For economists the computer has increasingly become the primary applied research tool and it is software that makes the computer work

The Practice of Econometric Theory Charles G. Renfro, 2009-06-29 Econometric theory as presented in textbooks and the econometric literature generally is a somewhat disparate collection of findings Its essential nature is to be a set of demonstrated results that increase over time each logically based on a specific set of axioms or assumptions yet at every moment rather than a finished work these inevitably form an incomplete body of knowledge The practice of econometric theory consists of selecting from applying and evaluating this literature so as to test its applicability and range The creation development and use of computer software has led applied economic research into a new age This book describes the history of econometric computation from 1950 to the present day based upon an interactive survey involving the collaboration of the many econometricians who have designed and developed this software It identifies each of the econometric software packages that are made available to and used by economists and econometricians worldwide

Omitted Variable Tests and Dynamic Specification Björn Schmolck, 2012-12-06 This book deals with the omitted variable test for a multivariate time series regression model The empirical motivation is the homogeneity test for a consumer demand system The consequences of

using a dynamically misspecified omitted variable test are shown in detail The analysis starts with the univariate t test and is then extended to the multivariate regression system The small sample performance of the dynamically correctly specified omitted variable test is analysed by simulation Two classes of tests are considered versions of the likelihood ratio test and the robust Wald test which is based on a heteroskedasticity and autocorrelation consistent variance covariance estimator HAC
