Micromuseology Analysis Small Independent Museums:

Micromuseology Fiona Candlin, 2015-11-05 How would our understanding of museums change if we used the Vintage Wireless Museum or the Museum of Witchcraft as examples rather than the British Museum or the Louvre Although there are thousands of small independent single subject museums in the UK Europe and North America the field of museum studies remains focused almost exclusively on major institutions In this ground breaking new book Fiona Candlin reveals how micromuseums challenge preconceived ideas about what museums are and how they operate Based on extensive fieldwork and analysis of more than fifty micromuseums she shows how they offer dramatically different models of curation interpretation and visitor experience and how their analysis generates new perspectives on subjects such as display objects collections architecture and the public sphere The first ever book dedicated to the subject Micromuseology provides a platform for radically rethinking key debates within museum studies Destined to transform the field it is essential reading for students and researchers in museum studies anthropology material culture studies and visual culture *Independent Museums and Culture Centres in Colonial and Post-colonial Zimbabwe* Thomas Panganayi Thondhlana, Jesmael Mataga, Dawson Munjeri, 2022-04-03 Independent Museums and Culture Centres in Colonial and Post colonial Zimbabwe presents case studies that grapple with the issue of decolonising practice in privately owned museums and cultural centres in Zimbabwe Including contributions from academics and practitioners this book focusses on privately run cultural institutions and highlights that there has until now been scant scholarly information about their existence and practice Arguing that the recent resurgence of such museums which are not usually obliged to endorse official narratives of the central government points to some desire to decolonise and indigenise museums the contributors explore approaches that have been used to reconfigure such colonially inherited institutions to suit the post colonial terrain The volume also explores how privately owned museums can tap into or contribute to current conversations on decoloniality that encourage reflexivity inclusivity de patriarchy multivocality community participation and agency Exploring the motives and purpose of such institutions the book argues that they are being utilised to confront deeply entrenched stigmatisation and marginalisation Independent Museums and Culture Centres in Colonial and Post colonial Zimbabwe demonstrates that post colonial African museums have become an arena for negotiating history legacies and identities The book will be of interest to academics and students around the world who are engaged in the study of museums and heritage African studies history and culture It will also appeal to museum practitioners working across Africa and beyond *Introducing Museum Studies* Gordon Fyfe, 2025-06-17 Introducing Museum Studies is the first introductory textbook for museum studies Providing a wide ranging and original overview of museums from a historical and contemporary perspective it covers key topics such as the history of the museum the museum as a public space visitors and communities The book shows how museums far from being neutral collections exhibit objects which convey powerful symbolic meanings This cultural turn away from the object as a thing in itself has

placed museums at the centre of debates about public culture citizenship inclusion and repatriation Museums are becoming increasingly reflexive given the awareness of the social and political role they serve and their ability to reflect the problems of our time Gordon Fyfe shows how and why this reflexivity creates a need for historical perspective on current practices on the one hand museums are enmeshed in a changing world and on the other hand they exhibit change At their best museums help us to see that everything is on the move and that change is the natural order of things Accessibly written this is the go to introduction for scholars and students of museum studies arts and cultural management and heritage studies **A**

Museum Studies Approach to Heritage Sheila Watson,Amy Jane Barnes,Katy Bunning,2018-10-08 Heritage s revival as a respected academic subject has in part resulted from an increased awareness and understanding of indigenous rights and non Western philosophies and practices and a growing respect for the intangible Heritage has thus far focused on management tourism and the traditionally heritage minded disciplines such as archaeology geography and social and cultural theory Widening the scope of international heritage studies A Museum Studies Approach to Heritage explores heritage through new areas of knowledge including emotion and affect the politics of dissent migration and intercultural and participatory dimensions of heritage Drawing on a range of disciplines and the best from established sources the book includes writing not typically recognised as heritage but which nevertheless makes a valuable contribution to the debate about what heritage is what it can do and how it works and for whom Including heritage perspectives from beyond the professional sphere the book serves as a reminder that heritage is not just an academic concern but a deeply felt and keenly valued public and private practice This blending of traditional topics and emerging trends established theory and concepts from other disciplines offers readers international views of the past and future of this growing field A Museum Studies Approach to Heritage offers a wider more current and more inclusive overview of issues and practices in heritage and its intersection with museums As such the book will be essential reading for postgraduate students of heritage and museum studies It will also be of great interest to academics practitioners and anyone else who is interested in how we conceptualise and use the past *The Sustainable Museum* Christopher J.
