Samuel, 2013-07-05 The notion of one day disappearing from the earth forever is contrary to many of America s defining cultural values with death and dying viewed as un American experiences Arguing that death and dying may be our last major taboo this book shows how death and dying became almost unmentionable words over the course of the last century Although we have recently made some progress in reconciling the fact that life is a finite resource we remain very unprepared for the approaching tsunami of death as the largest generation in history begins to age and die in great numbers *DEATH AMERICAN STYLE* is thus highly timely and relevant suggesting that Americans need to individually and collectively come to terms with mortality if we are to learn to treat death as an inevitable part of life and to prepare accordingly As more and more Americans face end of life decisions it will be vital for us to radically change the current view of death and dying The alternative the author argues is that the

The Five Ways We Grieve Susan A. Berger, 2011-03-08 In this new approach to understanding the impact of grief Susan A Berger goes beyond the commonly held theories of stages of grief with a new typology for self awareness and personal growth She offers practical advice for healing from a major loss in this presentation of five basic ways or types of grieving These five types describe how different people respond to a major loss The types are Nomads who have not yet resolved their grief and don't often understand how their loss has affected their lives Memorialists who are committed to preserving the memory of their loved ones by creating concrete memorials and rituals to honor them Normalizers who are committed to re creating a sense of family and community Activists who focus on helping other people who are dealing with the same disease or issues that caused their loved one's death Seekers who adopt religious philosophical or spiritual beliefs to create meaning in their lives Drawing on research results and anecdotes from working with the bereaved over the past ten years Berger examines how a person's worldview is affected after a major loss According to her findings people experience significant changes in their sense of mortality their values and priorities their perception of and orientation toward time and

the manner in which they fit in society The five types of grieving she finds reflect the choices people make in their efforts to adapt to dramatic life changes By identifying with one of the types readers who have suffered a recent loss or whose lives have been shaped by an early loss find ways of understanding the impact of the loss and of living more fully From Child to Elder Alan Pope,2006 From Child to Elder explores the personal growth that can arise when a middle aged adult loses his or her last living parent Based on an empirical phenomenological study this book details the complex ways in which the adult orphan s ongoing relationship to the deceased parents combined with the unique meanings of the loss leads to a deepening of individual autonomy and spiritual awakening Confrontation with mortality and fundamental aloneness promotes among other things an increased sense of existential responsibility toward self and others as the adult orphan psychologically assumes its new role as an elder These and many other themes are structured into an integrated whole and amplified through developmental existential and Jungian perspectives The result is a compelling portrait of the processes by which the death of one s parents can accelerate psychospiritual development
