Healthcare Access - New Threats, New Approaches Ayşe Emel Önal, 2023-11-02 Access to health care is the ability to receive health services for the prevention, detection and treatment of disorders that affect health. For health care to be accessible, it must be affordable and able to protect and improve health. There are myriad reasons that may make access to health services difficult or even impossible. These include economic problems, conflicts, climate change, internal and external migrations, beliefs and so on. This book examines many of these barriers to health care and proposes solutions for overcoming them.

Evidence-Based Practice for Health Professionals Bernadette Howlett, Ellen Rogo, Teresa Gabiola Shelton, 2020-02-11 Evidence Based Practice for Health Professionals Second Edition is an entry level textbook for health professional students that explores the basic concepts of evidence based practice with a clinical emphasis.

[Transforming Biomedical Informatics and Health Information Access](#) Betsy L. Humphreys, Randolph A. Miller, 2022-03-15 During his 31 year tenure as director of the U S National Library of Medicine (NLM), Donald A. B. Lindberg M.D. dramatically increased access to knowledge about health issues, medicine, medical care, the health professions and health literacy. As an enthusiastic visionary with a plan, his aim was to bring about a more efficient transfer and use of information and data. Dr Lindberg and the NLM helped transform and reshape medicine and the health system in the 20th and 21st centuries. Dr Lindberg envisioned, encouraged and supported the development of electronic health records and telemedicine. Coupled with the evolution of the Internet, these technologies made health systems more efficient for research, the delivery of clinical services, the education of health professionals, bioethics, improving the public's health literacy and disease prevention strategies. Dr

Lindberg also was committed to enhancing the capacity of underserved and minority populations to make use of NLM's health information resources. *Transforming Biomedical Informatics and Health Information Access* is a tribute to Don Lindberg and the NLM. The book is divided into four sections. The first documents the advances in biomedical informatics during Dr. Lindberg's career, emphasizing the contributions made by teams of talented individuals at the NLM. The second section describes how the NLM's creation of new methods of access to diverse biomedical databases improved information access for healthcare professionals, biomedical researchers, and the public. The third section explains how NLM's outreach programs improved access to health information among underrepresented audiences and communities. The more informal fourth section provides brief memoirs about Dr. Lindberg's life, character, and humanism. **Congressional Record Index**, 1993. Includes history of bills and resolutions. *Access to Medicine in the Global Economy* Cynthia Ho, 2011-04-21. The issue of how patents impact medicine has increased in significance within the last decade. The book provides an explanation of the current international infrastructure and explains how competing patent perspectives play a thus far unacknowledged role in promoting distortion and confusion. **Tobacco and Health** K. Slama, 2012-12-06. Over 1,100 delegates from a hundred countries attended the 9th World Conference on Tobacco and Health. After five days of debate, several important resolutions were adopted unanimously and will be landmarks in the fight against tobacco. This great success is due to three facts which emerged from the discussions: 1. It appears clearly now that the risks associated with tobacco are much greater than previously assumed. Out of two regular smokers, one will die from a tobacco-related disease. 2. Reducing tobacco consumption can be achieved, but the data collected in several countries show that it requires a global strategy. This strategy was much debated during the conference. The resolutions adopted emphasize the agreement of the delegates on the main points: Action to fight the growing epidemic of tobacco attributable disease and death involves convincing the general public, the medical community, and decision makers of the need to act for tobacco control. The most efficient tools for helping individuals never to start or successfully to stop using tobacco should be developed. Effective tobacco control endeavors are required to counteract the actions of the powerful and influential tobacco manufacturers. With the help and under the aegis of WHO, DICC, IUATLD, ISFC, IOCD, and IUHPE, an international alliance for health and against tobacco should unite all those who are engaged in this fight. **Access to Prevention and Public Health for High-risk Populations** United States. Congress. Senate. Committee on Health, Education, Labor, and Pensions, 2010. *Introduction to Research and Medical Literature for Health Professionals* J. Glenn Forister, J.
