Book Basics Marine Estuarine Ecology Abhijit:

Basics of Marine and Estuarine Ecology Abhijit Mitra, Sufia Zaman, 2016-02-02 The book presents recent research on marine ecology in different parts of the world. It aims to shed light on relevant topics for budding marine ecologists. The blue soup of Planet Earth, which comprises both biotic and abiotic components, is essential to keeping the wheel of civilization running. Four major ecosystem service categories have been identified within this context: namely provisioning services such as water, food, mangrove timber, honey, fish, wax, fuel, wood, fodder, and bioactive compounds from marine and estuarine flora and fauna; regulating services such as the regulation of climate, coastal erosion, coral bleaching, and pollution; cultural services encompassing recreational tourism, spiritual, and other non-material benefits; and supporting services such as nutrient cycling and photosynthesis. These valuable services are obtained from various resources that must be conserved for the sake of humanity. This book presents data for each resource type not just in the form of a simple description but also through case studies that resulted from several research projects and pilot programs carried out in different parts of the world. Statistical tools were also used to critically analyze the influence of relevant hydrological parameters on the biotic community. Advanced research in marine and estuarine ecology is based on the use of sophisticated instruments, sampling, precision statistical tools, etc., which have also been highlighted in the book.

Estuarine Acidification Abhijit Mitra, Sufia Zaman, 2021-08-24 This book provides a cross-sectoral, multi-disciplinary assessment of different problems associated with estuarine acidification, with special thrust on mangrove-dominated Indian Sundarban estuaries. The arms of ocean acidification have extended to coastal and estuarine waters where a wide spectrum of biodiversity thrives with unique adaptation. Extending several ecosystem services, the impact of acidification in these areas is a matter of concern as acidification potentially has more immediate effects on the health of estuaries and inshore regions as well as regional economies. Ground zero data collected for more than three decades have made the book stand on a strong base.

Blue Economy in Indian Sundarbans Abhijit Mitra, Sufia Zaman, Prosenjit Pramanick, 2022-08-28 This book provides a cross-sectoral, multidisciplinary assessment of the major verticals of Blue Economy relevant to the mangrove ecosystem in Indian Sundarbans, which is a deltaic complex at the apex of Bay of Bengal. This book evaluates the feasibility of Blue Economy considering the natural resource base in this mangrove-dominated deltaic complex. Chapter 1 discusses the need of expanding different marine and estuarine-oriented verticals of Blue Economy as the land resources are gradually becoming depleted. Chapter 2 highlights the wide spectrum of biotic and abiotic resources of the Indian Sundarbans, which can serve as the strong foundation of expanding Blue Economy in the region. Chapter 3 highlights several mangrove-based livelihoods that are not only innovative but may present new opportunities to initiate cottage industries. Chapter 4 highlights the threats associated with Blue Economy in Indian Sundarbans, like sea level rise, acidification of water, weather extremes, pollution, over-exploitation of natural resources, etc., along with ground zero environmental data collated over three decades. Chapter 5 offers several solutions to combat the

threats to regional Blue Economy emphasizing both technology and policy based management The book attempts to align the proliferation of different sectors of Blue Economy in the framework of Indian Sundarbans Mangrove Carbon Trading in the Lower Gangetic Delta Abhijit Mitra, Sufia Zaman, Prosenjit Pramanick, Sana Ahmed, 2024-12-14 True mangrove flora and their associates in the lower Gangetic region are noted for their wide spectrum of ecosystem services in which carbon storage and sequestration by the forest is one of the most important components Many researchers are updating the carbon repository of the lower Gangetic delta mangroves with the aim to ascertain their role to reduce the carbon dioxide level of the near surface atmosphere However due to difficulty in assessment marketing and lack of clarity over ownership of natural resources the mangrove based carbon trading system has not yet crystallized There is an estimated 13 76 Mha of mangrove forests world wide approximately 20% 2 6 Mha of which is potentially investible for carbon finance projects based on the probability of imminent threat The magnitude and the variability of threats to which the mangroves of the lower Gangetic delta are exposed to have made the trading process more complicated In addition gaps also exist between the national government policy and the trading of the blue carbon projects which has kept the future of such projects remain on hold The authors put forward the views that the creation of more financial facilities for restoration and expansion of blue carbon preferably mangroves with the involvement of the local communities can provide the initial capital involved in developing mangrove based carbon projects This includes the costs of conducting feasibility studies implementing capacity building programs monitoring the health of the mangrove plantation restoration on regular basis and creating mangrove based alternative livelihood programs that will support island dwellers of the region in order to accelerate the magnitude of mangrove based carbon projects leading to growth of the mangrove trading market **Estuarine Pollution in the Lower Gangetic Delta** Abhijit Mitra, 2018-08-13 This book critically analyzes the water quality in the lower Gangetic delta and examines the environmental conditions and physical processes operating in this rich ecosystem Readers with an interest in environmental science geography oceanography marine biology environmental biology aquatic pollution and ecology will find the research presented here most appealing Readers will discover critical aspects of the chemistry of the estuarine water particularly that of Hooghly and Matla estuaries in the lower stretch of the delta region along with the causes and effects of pollution in and around this region Particular attention is given to the bioaccumulation of conservative pollutants in edible fishes and floral communities thriving in this region Several case studies are also incorporated to highlight the vulnerability of pollution in this region Chapters also address the impacts of climate change specifically acidification on the concentration and behavior of conservative pollutants Finally the book highlights some mitigation measures at the technology and policy level to minimize the negative impacts posed by different groups of pollutants on the estuarine biodiversity Ecological Profile of Indian Sundarbans Abhijit Mitra (Marine biology teacher), 2004 *Impact of COVID-19 Lockdown on Environmental Health* Abhijit Mitra, 2023-04-05 This book examines the impacts that the COVID 19 lockdown has had on

environmental and ecological health with a focus on coastal ecosystems in the Lower Gangetic Delta The book begins with an overview of COVID 19 s spread and impact before and after the lockdown in the focus region then addresses the specific impacts that the lockdown period had and continues to have on air quality marine and estuarine water quality coastal biodiversity and the livelihoods of the region s inhabitants especially those who live below the poverty line The decrease in human activity combined with the complete closure of various sectors including air travel oil and gas drilling and construction has had a pronounced effect on biodiversity and overall environmental health that is yet to be fully realized The book sheds light on these changes and assesses how biodiversity ambient air quality and ecosystem functioning will progress as COVID 19 remains a threat and the lockdown persists The study will be of interest to researchers government officials and professionals dealing with disaster management environmental science biological science and health

Estuarine Pollution in the Lower Gangetic Delta Abhijit Mitra, 2018-09-21 This book critically analyzes the water quality in the lower Gangetic delta and examines the environmental conditions and physical processes operating in this rich ecosystem Readers with an interest in environmental science geography oceanography marine biology environmental biology aquatic pollution and ecology will find the research presented here most appealing Readers will discover critical aspects of the chemistry of the estuarine water particularly that of Hooghly and Matla estuaries in the lower stretch of the delta region along with the causes and effects of pollution in and around this region Particular attention is given to the bioaccumulation of conservative pollutants in edible fishes and floral communities thriving in this region Several case studies are also incorporated to highlight the vulnerability of pollution in this region Chapters also address the impacts of climate change specifically acidification on the concentration and behavior of conservative pollutants Finally the book highlights some mitigation measures at the technology and policy level to minimize the negative impacts posed by different groups of pollutants on the estuarine biodiversity

Practical Marine and Estuarine Ecology Wageningen University Aquatic Ecology and Water Quality Management Group, 2011

The Estuarine Ecosystem Donald S. McLusky, Michael Elliott, 2004-04-29 For the inhabitants of many of the world s major towns and cities estuaries provide their first and nearest glimpse of a natural habitat Despite the attempts of man to pollute or reclaim it the estuarine ecosystem continues to provide a fascinating insight into a natural world where energy is transformed from sunlight into plant material and then through the steps of a food chain is converted into a rich food supply for birds and fish The book provides a concise readable introduction to estuarine ecology First published in 1981 it soon established itself as the principle textbook of choice in the UK NW Europe This new edition builds upon the strengths of the earlier editions but has been thoroughly revised throughout The new co author brings a human impact dimension to the revised book It is written for advanced undergraduate and graduate students particularly taught masters who have had a general ecology course but no further training in estuarine science It will be useful to both professional researchers and practical managers in marine ecology and environmental science who seek a compact but

comprehensive introduction to estuarine ecology

The Top Books of the Year Book Basics Marine Estuarine Ecology Abhijit The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the fascinating narratives that have charmed audiences this year. Book Basics Marine Estuarine Ecology Abhijit : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
