Peterson, Martin R. West, 2003-11-18 The 2002 No Child Left Behind Act is the most important legislation in American education since the 1960s The law requires states to put into place a set of standards together with a comprehensive testing plan designed to

ensure these standards are met Students at schools that fail to meet those standards may leave for other schools and schools not progressing adequately become subject to reorganization The significance of the law lies less with federal dollar contributions than with the direction it gives to federal state and local school spending It helps codify the movement toward common standards and school accountability Yet NCLB will not transform American schools overnight The first scholarly assessment of the new legislation No Child Left Behind breaks new ground in the ongoing debate over accountability Contributors examine the law s origins the political and social forces that gave it shape the potential issues that will surface with its implementation and finally the law s likely consequences for American education **No Child Left Behind** William Hayes, 2008-08-14 While few would quarrel with the goal of the No Child Left Behind legislation the nation is badly divided over whether the law is having a positive effect on our schools At the same time it is also true that most Americans including many professional educators have only a limited understanding of the content and scope of the legislation As we are currently engaged in a national debate about the future role of the federal government in the field of education it is essential that people become better informed about the history content and results of No Child Left Behind This book is a valuable tool informing the current discussion on the reauthorization of the law As a result the reader will be better able to make up his own mind as to the direction we should take as a nation in pursuing the noble objective of ensuring that no child is left behind
