Non Coding Rnas In Plants Rna Technologies:

Non Coding RNAs in Plants Volker A. Erdmann, Jan Barciszewski, 2011-07-20 In the most recent years each of the RNA silencing pathways of plants have appeared to generate ncRNAs with dedicated functions specialized biological activities and specific functional scopes RNA silencing plays a crucial role in coordinating the expression stability protection and inheritance of eukaryotic genomes It compromises several mechanisms that invariably depend on core small non coding RNAs and that achieve dedicated sequence specific functions RNA silencing has been recognized to carry critical developmental stress response and bodyguard functions be coordinating the expression protection stability and inheritance of virtually all eukaryotic genomes Thus the ncRNAs encompass a wide set of mechanisms that achieve specialized functions

Long Noncoding RNAs in Plants Santosh Kumar Upadhyay, 2020-11-13 The growth of human population has increased the demand for improved yield and quality of crops and horticultural plants However plant productivity continues to be threatened by stresses such as heat cold drought heavy metals UV radiations bacterial and fungal pathogens and insect pests Long noncoding RNAs are associated with various developmental pathways regulatory systems abiotic and biotic stress responses and signaling and can provide an alternative strategy for stress management in plants Long Noncoding RNAs in Plants Roles in development and stress provides the most recent advances in lncRNAs including identification characterization and their potential applications and uses Introductory chapters include the basic features and brief history of development of lncRNAs studies in plants The book then provides the knowledge about the lncRNAs in various important agricultural and horticultural crops such as cereals legumes fruits vegetables and fiber crop cotton and their roles and applications in abiotic and biotic stress management Includes the latest advances and research in long noncoding RNAs in plants Provides alternative strategies for abiotic and biotic stress management in horticultural plants and agricultural crops Focuses on the application and uses of long noncoding RNAs

Non-coding RNA in Plants Rahul Datta, Chintan Kapadia, Subhan Danish, Sachidanand Singh, 2024-11-29 Non coding RNA in Plants Modulation and Stress Responses is the first book to present the basics of the importance of long non coding RNA and its potential in addressing abiotic and biotic stresses Describing the miRNA and small RNA and their role in plant development this book explains the importance of long non coding RNA in plants including its significance in virus resistance its transposable elements effector trigger immunity and fungal and bacterial resistance in plants Non coding RNA for Modulation and Stress Response in Plants presents the state of the science from its historical foundation through application throughout the lifecycle and production of agricultural and non agricultural plants While various coding has been explored within animal science plant exposition has been minimal This book is designed to inspire additional research and developments toward improved plant resiliency and production Presents foundational information for understanding the importance of long non coding RNA in plants Summarizes and illustrates identification and diversity analysis approaches toward Non coding RNA as regulations Explores how non coding

RNAs may play a role in the regulation of stress responses by highlighting their biogenesis and mechanisms of action

Non-Coding RNAs Jan Barciszewski, 2003-08-31 General inspection of a role performed in the cell by RNAs allows us to distinguish three major groups of transcripts I protein coding mRNAs II non coding housekeeping and III regulatory RNAs The housekeeping RNAs include RNA classes that are generally constitutively expressed and whose presence is required for normal function and viability of the cells On the other hand a group of regulatory RNAs includes RNA species that are expressed at certain stages of organism development or cell differentiation or as a response to external stimuli and can affect expression of other genes on the levels of transcription or translation Non coding RNA transcripts form a heterogeneous class of RNAs that can not be characterized by a single specific function Initially the term non coding RNA ncRNA was used primarily to describe polyadenylated and a capped eukaryotic RNAs transcribed by RNA polymerase II but lacking long open reading frames Now this definition can be extended to cover all RNA transcripts that do not show protein coding capacity and is sometimes used to describe any RNA that does not encode protein including introns This book is an in depth look at the function of Non Coding RNAs and their relationship to Molecular Biology and Molecular Biology *Functional analysis of species-specific noncoding RNAs in plants* Yuepeng Song, Mahmoud Yaish, Deqiang Zhang, Yun Zheng, Lianfeng Gu, Byeong-ha Lee, 2023-02-01
