Reuse Value By Richard Brilliant 2011 11 01:

The Lives of Jewish Things Gabrielle Anna Berlinger, Ruth von Bernuth, 2024-12-03 Tracing the paths of Jewish things across time place and culture this collection reveals complex stories of individual and collective struggles to survive

Reuse Value Richard Brilliant, Dale Kinney, 2016-04-08 This book offers a range of views on spolia and appropriation in art and architecture from fourth century Rome to the late twentieth century Using case studies from different historical moments and cultures contributors test the limits of spolia as a critical category and seek to define its specific character in relation to other forms of artistic appropriation Several authors explore the ethical issues raised by spoliation and their implications for the evaluation and interpretation of new work made with spolia The contemporary fascination with spolia is part of a larger cultural preoccupation with reuse recycling appropriation and re presentation in the Western world All of these practices speak to a desire to make use of pre existing artifacts objects images expressions for contemporary purposes Several essays in this volume focus on the distinction between spolia and other forms of reused objects While some authors prefer to elide such distinctions others insist that spolia entail some form of taking often violent and a diminution of the source from which they are removed The book opens with an essay by the scholar most responsible for the popularity of spolia studies in the later twentieth century Arnold Esch whose seminal article *Spolien* was published in 1969 Subsequent essays treat late Roman antiquity the Eastern Mediterranean and the Western Middle Ages medieval and modern attitudes to spolia in Southern Asia the Italian Renaissance the European Enlightenment modern America and contemporary architecture and visual culture

Conflict, Commerce, and an Aesthetic of Appropriation in the Italian Maritime Cities, 1000-1150 Karen Rose Mathews, 2018-01-03 In *Conflict Commerce and an Aesthetic of Appropriation in the Italian Maritime Cities 1000 1150* Karen Rose Mathews analyzes the relationship between war trade and the use of spolia appropriated objects from past and foreign cultures as architectural decoration in the public monuments of the Italian maritime republics in the eleventh and twelfth centuries This comparative study addressing five urban centers argues that the multivalence of spolia and their openness to new interpretations made them the ideal visual form to define a distinct Mediterranean identity for the inhabitants of these cities celebrating the wealth and prestige that resulted from the paired endeavors of war and commerce while referencing the cultures across the sea that inspired the greatest hostility fear or admiration

To the Collector Belong the Spoils Annie Pfeifer, 2023-02-15 *To the Collector Belong the Spoils* rethinks collecting as an artistic revolutionary and appropriative modernist practice which flourishes beyond institutions like museums or archives Through a constellation of three author collectors Henry James Walter Benjamin and Carl Einstein Annie Pfeifer examines the relationship between literary modernism and twentieth century practices of collecting objects From James s paper hoarding to Einstein s mania for African art and Benjamin s obsession with old Russian toys she shows how these authors literary techniques of compiling gleaning and reassembling constitute a modernist style of collecting that reimagines the relationship

between author and text source and medium Placing Benjamin and Einstein in surprising conversation with James sharpens the contours of collecting as aesthetic and political praxis underpinned by dangerous passions An apt figure for modernity the collector is caught between preservation and transformation order and chaos the past and the future Positing a shadow history of modernism rooted in collection citation and paraphrase To the Collector Belong the Spoils traces the movement s artistic innovation to its preoccupation with appropriating and rewriting the past By despoiling and decontextualizing the work of others these three authors engaged in a form of creative plunder that evokes collecting s long history in the spoils of war and conquest As Pfeifer demonstrates more than an archive or taxonomy modernist collecting practices became a radical creative endeavor the artist as collector the collector as artist

Reuse of Architectural Components Bailey

Bestul,2025-08-29 As the need for a circular construction industry becomes progressively more apparent building practitioners are increasingly turning to salvaged building components to construct new projects Yet the aesthetic potential of reused materials remains underexplored Drawing from art history architectural theory and constructed works this book develops a set of design strategies practitioners might employ to develop thoughtful architecturally rigorous reuse projects Author Bailey Bestul illustrates the immense design potential of reuse using nine themes that follow the reader from the initial stages of building planning to the finishing of the interior spaces Following an overview of the history of component reuse in building design and construction the first part of this book Planning strategies provides recommendations for the integration of scavenged building elements into the larger architectural work From the gap to the wrapper these chapters consider how designers might arrange reused components both to shelter and be sheltered while revealing the age and flaws of these components for maximum design effect The next part Assembly techniques considers how reuse projects might be constructed and the way in which the construction method impacts the architectural proposal Whether framing with sticks or stacking up stones these chapters demonstrate the variety of assembly opportunities available for found object projects Finally the part on Finishing suggests the ways these materials can create experiential spaces that may be variously uniform deeply complex and highly embellished Expanding upon the practical steps outlined in the technical literature this book provides designers with a set of frameworks for approaching architectural reuse during the more conceptual parts of the design process It is essential reading for professionals interested in integrating reuse in their architectural practice

A Companion to Medieval Art Conrad Rudolph,2019-05-07 A fully updated and comprehensive companion to Romanesque and Gothic art history This definitive reference brings together cutting edge scholarship devoted to the Romanesque and Gothic traditions in Northern Europe and provides a clear analytical survey of what is happening in this major area of Western art history The volume comprises original theoretical historical and historiographic essays written by renowned and emergent scholars who discuss the vibrancy of medieval art from both thematic and sub disciplinary perspectives Part of the Blackwell Companions to Art History A Companion to Medieval Art Second Edition features an international and ambitious

range of contributions covering reception formalism Gregory the Great pilgrimage art gender patronage marginalized images the concept of spolia manuscript illumination stained glass Cistercian architecture art of the crusader states and more Newly revised edition of a highly successful companion including 11 new articles Comprehensive coverage ranging from vision materiality and the artist through to architecture sculpture and painting Contains full color illustrations throughout plus notes on the book s many distinguished contributors A Companion to Medieval Art Romanesque and Gothic in Northern Europe Second Edition is an exciting and varied study that provides essential reading for students and teachers of Medieval art

Waste Matters Nikole Bouchard, 2020-12-01 For thousands of years humans have experimented with various methods of waste disposal from burning and burying to simply packing up and moving in search of an unscathed environment Habits of disposal are deeply ingrained in our daily lives so casual and continual that we rarely ever stop to ponder the big picture effects on social spatial and ecological orders Rethinking the ways in which we produce collect discard and reuse our waste whether it s materials spaces or places is essential to ensure a more feasible future Waste Matters Adaptive Reuse for Productive Landscapes presents a series of historical and contemporary design ideas that reimagine a range of repurposed materials at diverse scales and in various contexts by exploring methods of hacking disassembly reassembly recycling adaptive reuse and preservation of the built environment Waste Matters will inspire designers to sample and rearrange bits of artifacts from the past and present to produce culturally relevant and ecologically sensitive materials objects architecture and environments

"Striking Images, Iconoclasm Past and Present " Stacy Boldrick, 2017-07-05 All cultures make and break images Striking Images Iconoclasm Past and Present explores how and why people have made and modified images and other cultural material from pre history into the 21st century With its impressive chronological sweep and disciplinary breadth this is the first book about iconoclasm the breaking of images and the transformation of broader sets of signs that includes contributions from archaeologists curators and museum conservators as well as historians of art literature and religious studies The chapters examine themes critical to the study of iconoclasm violence punishment memory intentionality ruins and relics and their survival The conclusion shows how cross disciplinary debate amongst the contributors informed Tate Britain s Art under Attack exhibition 2013 and addresses the challenges iconoclasm presents to the modern museum By juxtaposing objects and places usually considered in isolation Striking Images raises provocative questions about our understandings of cross cultural differences and the value of representational objects from the broken swords of pre historical bog graves to the Bamiyan Buddhas and contemporary art Are any such objects ever finished or are they simply subject to constant transformation In dialogue with each other the essays consider this question and expand the field of iconoclasm and cultural studies

Monuments Decolonized Susan Slyomovics, 2024-07-23 Statuomania overtook Algeria beginning in the nineteenth century as the French affinity for monuments placed thousands of war memorials across the French colony But following Algeria s hard fought independence in 1962 these monuments took on different meaning and

some were repatriated to France legally or clandestinely Today in both Algeria and France people are moving and removing vandalizing and preserving this contested yet shared monumental heritage Susan Slyomovics follows the afterlives of French built war memorials in Algeria and those taken to France Drawing on extensive fieldwork in both countries and interviews with French and Algerian heritage actors and artists she analyzes the colonial nostalgia dissonant heritage and ongoing decolonization and iconoclasm of these works of art Monuments emerge here as objects with a soul offering visual records of the colonized Algerian native the European settler colonizer and the contemporary efforts to engage with a dark colonial past Richly illustrated with more than 100 color images Monuments Decolonized offers a fresh aesthetic take on the increasingly global move to fell monuments that celebrate settler colonial histories The Interior Architecture Theory Reader Gregory Marinic, 2018-01-17 The Interior Architecture Theory Reader presents a global compilation that collectively and specifically defines interior architecture Diverse views and comparative resources for interior architecture students educators scholars and practitioners are needed to develop a proper canon for this young discipline As a theoretical survey of interior architecture the book examines theory history and production to embrace a full range of interior identities in architecture interior design digital fabrication and spatial installation Authored by leading educators theorists and practitioners fifty chapters refine and expand the discourse surrounding interior architecture
