LADA X cross 5 2022 2022 To your attention is a small book to the history of the car LADA X cross 5 The aggravation of the Russian Ukrainian conflict in February 2022 led to the introduction of economic sanctions against Russia which affected the country s automotive industry A number of foreign brands left the automobile market and closed their assembly plants The first half of 2022 became a period of great trials for the Russian automotive industry Due to the sanctions imposed by the West the import of certain automobile components was directly prohibited while the supply of others became impossible due to the disruption of logistics chains Many foreign car companies including European and Japanese ones were directly prohibited from investing in the Russian economy As a result automobile assembly plants of which there have been many in Russia in recent decades still worked on the remnants of already imported car components last spring but by the middle of the year almost all of them stopped In the second half of the year some of the plants left by foreigners ended up in the hands of Russian owners Those in their turn quickly announced the restart of production However in a somewhat unexpected way with the participation of often unnamed foreign partners Our present day hero who will be discussed was born just because of these events This publication is intended for a wide range of readers interested in automotive technology and history
