Nitrosation Reactions And The Chemistry Of Nitric Oxide:

Nitrosation Reactions and the Chemistry of Nitric Oxide D.L.H. Williams, 2004-12-16 Since 1988 there has been much literature published on the chemistry of nitric oxide particularly in the field of S nitrosation and the chemistry of S nitroso compounds Written by a chemist for the chemistry community this book provides an update of the chemistry of nitrosation reactions dealing with both the synthetic and mechanistic aspects of these reactions It also looks at the chemistry of nitric oxide in relation to the amazing biological properties of this simple diatomic molecule which were unknown until around 1990 Provides an update on previously published literature on nitric oxide chemistry Contains chapters on reagents for nitrosation nitrosation at nitrogen aliphatic and aromatic carbon oxygen sulfur and metal centres Looks at hot research topics such as synthesis properties and reactions of s nitrosothiols *Dinitrosyl Iron Complexes as a "Working Form" of Nitric Oxide in Living Organisms* Anatoly F. Vanin, 2019-09-30 This book sums up the results of more than 50 years work on the physico chemical characteristics and biological activities of dinitrosyl iron complexes DNIC The interest of researchers in DNIC increased dramatically after the discovery of the fundamental role of the DNIC constituent nitrogen monoxide NO as one of the most universal regulators of metabolic processes occurring in living organisms By virtue of their ability to donate NO and nitrosonium ions NO DNIC mimic their beneficial regulatory and detrimental cytotoxic effects on living organisms and represent their working form This text will appeal to practitioners in the field of biology and other areas of modern day science
