Nieuw Nederland ,1987 Achtergronden van de expositie en van het project Nederland Nu Als Ontwerp Rule and Order Dutch Planning Doctrine in the Twentieth Century A. Faludi,A.J. van der Valk,2013-04-17 This book is about an art in which the Netherlands excels strategic planning Foreign observers will need little convincing of the merits of Dutch planning They will want to know whether routine explanations small country industrious disciplined people hardened by the perennial fight against the sea hold any water and they will want to know where to look for the bag of tricks of Dutch planners Dutch readers need to be convinced first that planning in the Netherlands is indeed effective before contemplating how this has come about Our message for both is that to the extent that Dutch planners do live in what others are inclined to see as a planners paradise it is a paradise carefully constructed and maintained by the planners themselves This smacks of Bernard Shaw describing a profession as a conspiracy against laity However all knowledge and all technologies are socially constructed meaning that they are the products of people or groups pursuing often conflicting aims and coming to arrangements about what is to pass as true and good So this takes away the odium of Dutch planners having their own agenda Positioning ourselves We are in the business of interpreting Dutch planning and at the same time committed to improving it This makes us part of the situation which we describe This situation is characterized by the existence of two divergent traditions urban design and the social science discipline called planologie *The Urban Connection* Luuk Boelens,2009 The urban connection develops a promising actor relational approach to urban planning With respect to the usual governmental planning it is focused outside in instead of inside out It derives its leitmotif from the actual debate about state controlled versus neo liberal planning and reflects on innovative post structuralist scholars in the field of planning economics social geography and governance It then takes its own position in that debate reflecting on actor oriented experiments in planning practices These experiments deal with the daily planning practice with a pro active and operational attitude contrary to the usual retrospective case studies Therefore it results in concrete suggestions on how to develop a more robust planning approach in an ongoing globalising and fragmenting world **Bibliografie van in Nederland**
