questioners barely address the writer's role that has defined him since the 1950s. Unlike previous volumes in which he speaks with interviewers, Elie Wiesel's *Conversations* collects interviews which set in relief the writer at work. This book focuses on Wiesel the literary artist instead of Wiesel the Holocaust survivor or the 1986 Nobel Peace Prize laureate. Beyond highlighting Wiesel's literary significance, these interviews also correct many faulty assumptions about his achievement. Few American readers know that he writes in French, that he has been favorably compared to André Malraux and Albert Camus. Not many realize that the Holocaust has been the subject of only a few of his forty books. Particularly in his nonfiction, Wiesel's scope is wide, addressing Jewish life in all its religious and historical complexity. Though most of Wiesel's books do not focus on the Holocaust, they are written against the backdrop of what he has come to term *The Event*. Always the presence of Auschwitz can be felt; always the author lives in the shadows of the flames that once illuminated and blinded him. These interviews are reminders that the writing life is both solitary and public, interior and social. The writer must venture beyond his study and speak out against the world's traumas and outrages.

Robert Franciosi is an associate professor of English at Grand Valley State University in Allendale, Michigan. He is the editor of *Good Morning: A Holocaust Memoir*. His work has appeared in *American Poetry*, *Contemporary Literature*, *Modern Jewish Studies*, and the *William Carlos Williams Review*.

Your Library Is the Answer Christina T. Russo, Cathy Swan, 2015-01-22 Today's tech-savvy and digitally connected students present a new challenge for today's school librarians. This book offers the 21st-century tools and know-how necessary for educators to appeal to and challenge students to learn and to want to learn. What are the best ways to motivate students to become engaged and develop a passion for learning? Can appealing to their desire for socialization and constant communication attributes of their lives outside of education via the integration of cutting-edge technologies and new media in the library or classroom serve to ignite creativity, curiosity, and critical thinking? This book shows how you can make use of non-traditional tools such as popular social networks, collaborative technologies, and cloud computing to teach information and communications technologies integrated with the school curriculum to improve student learning and demonstrates how these same technologies can help you measure skills and mastery learning. The book provides an easy-to-follow blueprint for using collaborative techniques, innovation, and teaching for creativity to achieve the new learning paradigm of self-directed learning such as flipping the classroom or library. Readers of this book will find concrete, step-by-step examples of proven lesson plans, collaborative models, and time-saving strategies for the successful integration of American Association of School Librarians (AASL) standards. The authors, both award-winning teachers, explain the quantitatively and qualitatively measurable educational value of using these technologies for core curricular and information and communications technologies instruction, showing that they both enhance student learning outcomes and provide data for measuring their impact on learning.
