Sutton, 2020-06-03 How does the past matter in the present How is a feeling of ownership of the past expressed in people s everyday lives Should continuity with the distant past be seen as simply a nationalist fiction or is it transformed by local historical imagination While recent anthropological studies have focused on reconstructing disputed histories this book examines the multiple ways in which the past is used by people as a

critical resource for interpreting the meanings of a changing present. It poses the issue of the felt relevance of the past in constructing present day identities. The Greek island of Kalymnos is a barren and seemingly bucolic setting of tourist imagination. But its history has been one of almost continuous occupation by foreign powers and of often fierce resistance. This has made Kalymnians particularly sensitive to seeing their island in a much wider context and to understanding the games played by the powerful. In examining changing gender relations, European integration and local perceptions of the war in the former Yugoslavia, this book brings together local, national and international perspectives in a unified field. Controversial contemporary practices of dynamite throwing and dowry giving serve as tropes through which Kalymnians explore alternative ways of living in a changing world. Further, the author argues persuasively for the crucial importance of situated fieldwork in peripheral places in understanding the issues and conflicts of a transnational world. This book serves as an highly readable case study of the complex connections between local and global discourses and practices and how they are shaped by their relationship to the past.

A History of Cast Iron in Architecture John Gloag, Derek Bridgwater, 2022-10-24. Originally published in 1948, *A History of Cast Iron in Architecture* is a comprehensive history of the part that has been played by cast iron in architecture and the allied arts in Britain. Any history of the rise and development of the iron founding industry becomes virtually a history of the First Industrial Revolution. Examining the use of cast iron by builders and architects from late medieval times to the middle of the 20th Century, the authors have also recorded a miniature history of British Industry. The introduction throws light on the early developments of iron founding. The main sections of the book describe the rise and expansion of the cast iron industry and its gradually increasing significance in architecture from 1650 to 1945. There are over 500 illustrations.

Destroy the Copy - Plaster Cast Collections in the 19th-20th Centuries Annetta Alexandridis, Lorenz Winkler-Horaček, 2022-09-06. Based on two international conferences held at Cornell University and the Freie Universität of Berlin in 2010 and 2015, this volume is the first ever to explicitly address the destruction of plaster cast collections of ancient Mediterranean and Western sculpture. Focusing on Europe, the Americas and Japan, art historians, archaeologists and a literary scholar discuss how different museum and academic traditions, national as well as disciplinary notions of value and authenticity or colonialism impacted the fate of collections. The texts offer detailed documentation of degrees of destruction by spectacular acts of defacement, demolition, discarding or neglect. They also shed light on the accompanying discourses regarding aesthetic ideals, political ideologies, educational and scholarly practices or race. With destruction being understood as a critical part of reception, the histories of cast collections defy the traditional homogenous narrative of rise and decline. Their diverse histories provide critical evidence for rethinking the use and display of plaster cast collections in the contemporary moment.
