Total Solar Eclipses and How to Observe Them Martin Mobberley, 2007-08-03 To children the world is full of magical events and the line between make believe and reality is happily distinctly blurred However as we all age and have to be realistic earn money become serious and responsible adults yawn and accept that life is short and no one is immortal those magical events fade and die We accept that the worlds of make believe are simply a

product of the vivid imaginations of great story tellers and that we are all very similar human beings just slipping away at the tedious day job and hoping for a win on the lottery However there are still a few events which are truly magical and for me total solar eclipses TSEs are about as magical an event as you can ever experience Our Earth and Sun are by a ludicrously lucky coincidence or some would argue by a cosmic architect almost the same apparent size in the sky Thus seventy times a century the Moon's shadow passes over a narrow band on the Earth's surface and for those on the track with clear skies a truly awe inspiring sight can be seen But be warned eclipse chasing is an addictive drug Once you have seen totality you will crave more of the same The sight of an eclipsed Sun is the stuff of science fiction but for the cost of a plane ticket or an organized holiday it can be yours albeit for a few fleeting minutes [Bibliography of Scientific and Industrial Reports](#) ,1946
