No Roads Leads To Rome:

(Not) All Roads Lead to Rome Arnau Lario Devesa, Joan Campmany Jiménez, Marc Marzo Pallàs, Oriol Morillas Samaniego, 2023-07-27 This book considers mobility in Antiquity in its broadest sense from a multidisciplinary perspective Although mobility is always present in studies of exchange and cultural diffusion here it is discussed as a key feature of societies inherent to their functioning and where cultural social and economic processes meet **All Roads Lead to Rome** David Ward, 2015-11-10 The book is about a sponsored cycle ride undertaken in May 1998 with the objective of cycling from Sheffield to Rome in the space of a fortnight The story describes the obstacles and hazards involved in trying to complete such a challenging feat *All Roads Lead to Rome* Hank Davis, David Afsharirad, 2025-06-03 CLASSIC SF STORIES FOR ANYONE THINKING ABOUT THE ROMAN EMPIRE Imperium Sine Fine Step back in time and traverse the stars with classic stories that reimagine the grandeur of the Roman Empire with a science fiction twist From the vastness of interstellar conquests to the intricate politics of alien worlds these tales blend history and imagination exploring what might have been if Rome had extended its reach beyond the cosmos Join us as we uncover the stories that blend the glory of the past with the possibilities of the future where the empire never truly fell but soared among the stars At the publisher s request this title is sold without DRM Digital Rights Management Praise for anthologies edited by Hank Davis and David Afsharirad This intriguing anthology explores the human race s violent potential but also bends toward exploration and the triumph of the human spirit with brave tales that take the reader on a fascinating thought provoking enjoyable journey Publishers Weekly on The Year s Best Military SF and Space Opera starred review *Causation and Free Will* Carolina Sartorio, 2016-03-03 Carolina Sartorio argues that only the actual causes of our behaviour matter to our freedom Although this simple view of freedom clashes with most theories of responsibility including the most prominent actual sequence theories currently on offer Sartorio argues for its truth The key she claims lies in a correct understanding of the role played by causation in a view of that kind Causation has some important features that make it a responsibility grounding relation and this to the success of the view Also when agents act freely the actual causes are richer than they appear to be at first sight in particular they reflect the agents sensitivity to reasons where this includes both the existence of actual reasons and the absence of other counterfactual reasons So acting freely requires more causes and quite complex causes as opposed to fewer causes and simpler causes and is compatible with those causes being deterministic The book connects two different debates the one on causation and the one on the problem of free will in new and illuminating ways **All Roads Lead to Rome** Bill Thorness, 2024-12-10 What happens when a seasoned journalist and travel writer takes on his most challenging assignment yet crossing not just continents but also history by retracing his father s steps on the battlefields of Italy in World War II When a slim packet of his father s letters came to light after his mother s death Bill Thorness began a quest to rediscover his father Thorness traveled to the World War II battlefields where America s first team of commandos fought The youngest son

of one of those commandos Thorness gained a sense of the horror his father had kept from his family while standing on the mountain where the First Special Service Force fought Then standing on a bridge in Rome he reflected on the loss his father must have felt in not making it to the end of the campaign to liberate the Eternal City In All Roads Lead to Rome Thorness considers his father's decisive moments in battle and beyond and how he soldiered on as a disabled veteran through his life raising a family and succumbing to an early death Alternating between reimagined battle scenes and present day travels Thorness explores World War II and family history the value and limits of memory the attitudes of war and our society's inadequate understanding and support of combat veterans who may return with physical and emotional scars that change them deeply Thorness steps into his father's shoes to revisit his story and finish that walk into Rome weaving an account that is part travelogue part history and part memoir about the ravages of war

Anzio Fred Sheehan, 1994 One of the most bitterly contested pieces of land in World War II was a strip of Italian seacoast fifteen miles long and seven miles deep the Anzio beachhead Fred Sheehan a soldier who participated in the campaign tells the story of this largely neglected battle whose purpose was to open the road to Rome The unopposed January 1944 landing of 40 000 Allied troops seemed to promise easy victory Yet a month later with their number increased to 120 000 the Allies were no nearer Rome and were desperately fighting to hold their own against the German forces of Field Marshal Albert Kesselring After a four month siege the Allies finally established a firm foothold in what Kesselring himself called an epic of bravery

The Obligation Dilemma Ishtiyaque Haji, 2019 There are no moral obligations either it is determined in advance what we will do or it is not But any action not in our control cannot be obligatory for us Hence regardless of whether our actions are determined to occur nothing is obligatory This conclusion has important implications for conceptions of moral responsibility and free will

A Transition to Mathematics with Proofs Michael J. Cullinane, 2013 Developed for the transition course for mathematics majors moving beyond the primarily procedural methods of their calculus courses toward a more abstract and conceptual environment found in more advanced courses A Transition to Mathematics with Proofs emphasizes mathematical rigor and helps students learn how to develop and write mathematical proofs The author takes great care to develop a text that is accessible and readable for students at all levels It addresses standard topics such as set theory number system logic relations functions and induction in at a pace appropriate for a wide range of readers Throughout early chapters students gradually become aware of the need for rigor proof and precision and mathematical ideas are motivated through examples Proof techniques and strategies are thoroughly discussed and the underlying logic behind them is made transparent Each chapter section begins with a set of guided reading questions intended to help students to identify the most significant points made within the section Practice problems are embedded within chapters so that students can actively work with a key idea that has just been introduced Each chapter also includes a collection of problems ranging in level of difficulty which are perfect for in class discussion or homework assignments 2013 354 pages

New Advances in Causation, Agency and

Moral Responsibility Fabio Bacchini, Stefano Caputo, 2015-01-12 This volume brings together a number of previously unpublished essays that will advance the reader's philosophical understanding of specific aspects of causation, agency and moral responsibility. These are deeply intertwined notions and a large proportion of the volume is taken up by papers that shed light on their mutual connections or defend certain claims concerning them. The volume investigates several important questions including: Can causation be perceived? If it can, can it be perceived in any way other than visually? Can the interventionist theory developed by James Woodward offer an adequate account of causation? Is a causal relation a necessary condition for moral responsibility? Can there be a responsibility difference without a causal difference? Are causal ascriptions based on the more primitive language game of blame ascriptions? What can be learnt from the analogy between causal interference and unbreakable processes on one side and motivational interferences and unbreakable resolutions on the other side? How can humans be routinely considered responsible for non-deliberated omissions? Should the connection between moral responsibility and the epistemic conditions usually required for moral responsibility to be obtained be weakened? What is the connection between awareness of one's doing and intentional action?

Asymmetry and Markedness Theory II Shen Jiaxuan, 2025-09-23 This second volume examines asymmetry in language by focusing on how linguistic form and meaning align or diverge. Building on the concepts introduced in Volume 1, this volume analyzes symmetry and asymmetry in form-meaning relations using examples from antonym pairs, subject-object contrasts and the markedness patterns of adjectives. It integrates several linguistic levels, emphasizing how functional and cognitive factors drive these phenomena. The concluding discussion posits that asymmetry persists as a core feature of language, whereas symmetry is conditional and transient. This volume will appeal to linguists, language educators and anyone seeking deeper insights into linguistic structure and function, particularly in Chinese linguistics, markedness research and comparative language studies.
