Nobel Dreams Power Deceit And The Ultimate Experiment:

Nobel Dreams Gary Taubes,1988 The Elusive Benefits of Undereating and Exercise Gary Taubes,2017-02-13 It should come as no surprise that low calorie and low fat diets rarely accomplish what they are expected to do improve health and slim waistlines Likewise exercise however beneficial it may be to fitness only increases appetite and so often hinders weight loss In this sharp and persuasive piece acclaimed and bestselling science writer Gary Taubes exposes erroneous nutritional guidelines and finally provides evidence to curb misguided calories in calories out model for why we get fat A Vintage Shorts Wellness selection An ebook short Social Dilemmas Wim Liebrand,David Messick,Henk Wilke,2015-07-01 This book describes the advances and insights made by social scientists from around the world into the understanding and resolution of social dilemmas Each chapter discusses its own research findings against the background of a more comprehensive view of social dilemmas **A Field Guide for Science Writers** Deborah Blum,Mary Knudson,1998 This authoritative handbook gathers together insights and tips personal stories and lessons of some of America s best known science writers men and women who work for The New York Times The Washington Post The Chicago Tribune The San Francisco Examiner Time National Public Radio and other eminent news outlets Filled with wonderful anecdotes and down to earth practical information it is both illuminating and a pleasure to read The Case Against Sugar Gary Taubes,2016-12-27 From the best selling author of Why We Get Fat a groundbreaking eye opening expos that makes the convincing case that sugar is the tobacco of the new millennium backed by powerful lobbies entrenched in our lives and making us very sick Among Americans diabetes is more prevalent today than ever obesity is at epidemic proportions nearly 10% of children are thought to have nonalcoholic fatty liver disease And sugar is at the root of these and other critical society wide health related problems With his signature command of both science and straight talk Gary Taubes delves into Americans history with sugar its uses as a preservative as an additive in cigarettes the contemporary overuse of high fructose corn syrup He explains what research has shown about our addiction to sweets He clarifies the arguments against sugar corrects misconceptions about the relationship between sugar and weight loss and provides the perspective necessary to make informed decisions about sugar as individuals and as a society Critical Issues in Human Resource Management Ian Roper,Rea Prouska,Uracha Chatrakul Na Ayudhya,2019-09-21 By problematising core HR topics and presenting significant new developments in the field this engaging textbook will enable students to develop a nuanced and critical approach to HRM It integrates students understanding of the key operational aspects of HRM with the wider institutional social political and economic contexts in which they occur covering important and emerging topics such as intersectionality wellbeing international migration globalisation and corporate governance Theoretically rigorous and rich in pedagogy this textbook will hone students critical thinking skills allowing them to confront higher level problems faced in HR and deal with complex real world HR situations A range of topical international case studies ranging from iPhone factories in China to contemporary US

politics places HR issues in a comparative global context This is an essential textbook for upper undergraduate postgraduate and MBA students studying contemporary or critical issues in HRM It can also be used as a supplementary text by those wanting to deepen their knowledge of HRM and by practitioners keen to understand how core HRM topics intersect with wider contemporary and global issues

Why We Get Fat Gary Taubes, 2010-12-28 NATIONAL BESTSELLER Taubes stands the received wisdom about diet and exercise on its head The New York Times What's making us fat And how can we change Building upon his critical work in Good Calories Bad Calories and presenting fresh evidence for his claim bestselling author Gary Taubes revisits these urgent questions Featuring a new afterword with answers to frequently asked questions Taubes reveals the bad nutritional science of the last century none more damaging or misguided than the calories in calories out model of why we get fat and the good science that has been ignored He also answers the most persistent questions Why are some people thin and others fat What roles do exercise and genetics play in our weight What foods should we eat and what foods should we avoid Persuasive straightforward and practical Why We Get Fat is an essential guide to nutrition and weight management Complete with an easy to follow diet Featuring a new afterword with answers to frequently asked questions

What's Wrong with Sociology? Stephen Cole, 2018-04-17 Since the 1950s sociology has experienced a decline in prestige when compared with the other social sciences In some highly publicized cases some universities have retrenched their sociology departments others are contemplating either retrenchment or downsizing of their departments Although there are some practitioners of the discipline who believe that it has never been in better shape many sociologists have come to believe that there are very serious problems both in the cognitive and social organization of the discipline This book contains sixteen essays by sociologists who believe that their discipline faces very serious problems which must be overcome if the discipline is to survive and prosper The contributors were selected to represent diverse views and thus there is substantial disagreement among them over what the problems are that sociology faces and how they may be remedied In this highly provocative book readers is likely to find some essays they agree with and others they disagree with but all the essays present important problems faced by the discipline which must be addressed Although the authors of the sixteen essays do not agree on what is wrong with the discipline there are some themes which appear frequently In his introduction Cole summarizes and comments on these themes His introduction centers on the question of whether sociology is entirely socially constructed Is what we believe to be true about society constrained by empirical evidence or is it a result of our ideology power authority and other social processes One theme which appears in many of the essays is that sociology has become too ideological and as a result has lost credibility among university administrators politicians and the general public Many of the essays also stress the view that there are very low levels of consensus in sociology and that it is hard to see evidence of progress Others criticize the discipline for not dealing with the really important social issues and see much of the work published as being parochial and trivial Questions are also raised about why the use of causal models has failed to generate

solutions to most of the problems the discipline addresses Some authors believe that the discipline adheres to an overly rational model of human behavior and has failed to keep up with some of the advances introduced by post modernist theories This highly readable set of essays should be of interest to all those are concerned about the current state of sociology They will also be useful in introducing graduate students to some of the most important issues currently being debated in the field Stephen Cole is currently professor of sociology at the State University of New York at Stony Brook and professor of sociology at the University of Queensland Australia He is the author of Making Science Between Nature and Society and with Jonathan R Cole Social Stratification in Science

History of CERN, III J. Krige, 1996-12-18 The present volume covers the story of the history of CERN from the mid 1960s to the late 1970s The book is organized in three main parts The first containing contributions by historians of science perceives the laboratory as being at the node of a complex of interconnected relationships between scientists and science managers on the staff the users in the member states and the governments which were called upon to finance the organization Parts II and III include chapters by practising scientists The former surveys the theoretical and experimental physics results obtained at CERN in this period while the latter describes the development of the laboratory s accelerator complex and Charkap detection techniques

The Telescope in the Ice Mark Bowen, 2017-11-14 IceCube Observatory a South Pole instrument making the first actual observations of high energy neutrinos has been called the weirdest of the seven wonders of modern astronomy by Scientific American In The Telescope in the Ice Mark Bowen tells the amazing story of the people who built the instrument and the science involved Located near the U S Amundsen Scott Research Station at the geographic South Pole IceCube is unlike most telescopes in that it is not designed to detect light It employs a cubic kilometer of diamond clear ice more than a mile beneath the surface to detect an elementary particle known as the neutrino In 2010 it detected the first extraterrestrial high energy neutrinos and thus gave birth to a new field of astronomy IceCube is also the largest particle physics detector ever built Its scientific goals span not only astrophysics and cosmology but also pure particle physics And since the neutrino is one of the strangest and least understood of the known elementary particles this is fertile ground Neutrino physics is perhaps the most active field in particle physics today and IceCube is at the forefront The Telescope in the Ice is ultimately a book about people and the thrill of the chase the struggle to understand the neutrino and the pioneers and inventors of neutrino astronomy
