Self Deception Unmasked Self Deception Unmasked

William Wood, William Dalton Wood

Self Deception Unmasked Self Deception Unmasked:

Self-Deception Unmasked Alfred R. Mele, 2000-11-13 Self deception raises complex questions about the nature of belief and the structure of the human mind In this book Alfred Mele addresses four of the most critical of these questions What is it to deceive oneself How do we deceive ourselves Why do we deceive ourselves Is self deception really possible Drawing on cutting edge empirical research on everyday reasoning and biases Mele takes issue with commonplace attempts to equate the processes of self deception with those of stereotypical interpersonal deception Such attempts he demonstrates are fundamentally misguided particularly in the assumption that self deception is intentional In their place Mele proposes a compelling empirically informed account of the motivational causes of biased beliefs At the heart of this theory is an appreciation of how emotion and motivation may without our knowing it bias our assessment of evidence for beliefs Highlighting motivation and emotion Mele develops a pair of approaches for explaining the two forms of self deception the straight form in which we believe what we want to be true and the twisted form in which we believe what we wish to be false Underlying Mele's work is an abiding interest in understanding and explaining the behavior of real human beings The result is a comprehensive elegant empirically grounded theory of everyday self deception that should engage philosophers and social scientists alike

Self-Deception's Puzzles and Processes Jason Kido Lopez, 2016-08-16 The contemporary literature on self deception was born out of Jean Paul Sartre's work on bad faith lying to oneself As time has progressed the conception of self deception has moved further and further away from Sartre's conception of bad faith In *Self Deception's Puzzles and Processes* A Return to a Sartrean View Jason Kido Lopez argues that this departure is a mistake and that we should return to thinking about self deception in a Sartrean fashion in which we are self deceived when we intentionally use the strategies and methods of interpersonal deception on ourselves Since literally tricking ourselves cannot work we will always see through our own self deception after all self deception merely consists of the attempt to trick ourselves in this way Other scholars have rejected this notion of self deception historically dismissing it as paradoxical Lopez argues first that it isn't paradoxical and he further suggests that moving away from this notion of self deception has caused the contemporary literature on the topic to be littered with disparate and conflicting theories Indeed there are a great many ways to avoid the allegedly paradoxical Sartrean notion of self deception and the resulting plethora of accounts lead to a fragmented picture of self deception If however the Sartrean view isn't paradoxical then there was no need for the host of contradictory theories and most researchers on self deception have missed what was originally so intriguing about self deception that it like bad faith is the process of literally trying to trick oneself into believing what is false or unwarranted *Self Deception's Puzzles and Processes* will be of great interest to students and scholars of epistemology philosophy of mind psychology and continental philosophy and to anyone else interested in the problems of self deception

Blaise Pascal on Duplicity, Sin, and the Fall William Wood, William Dalton Wood, 2013-07-04 Blaise Pascal on Duplicity Sin and the Fall The Secret Instinct is the first

book on Pascal's theology to appear in English in more than 40 years. It is about Pascal's understanding of the cognitive consequences of the Fall. According to Pascal, human beings have an innate aversion to the truth that is also at the same time an aversion to God. We are born into a duplicitous world that shapes us into duplicitous agents and so we find it easy to reject God continually and deceive ourselves about our own sinfulness. This book offers more than just a novel interpretation of Pascal's main text, the *Pensées*. It also shows that Pascal is a long neglected resource for constructive theology and that Pascalian theology is both possible and fruitful.

The Oxford Handbook of Moral Psychology Manuel Vargas, John Doris, 2022-03-24. Moral psychology is the study of how human minds make and are made by human morality. This state-of-the-art volume covers contemporary philosophical and psychological work on moral psychology as well as notable historical theories and figures in the field of moral psychology such as Aristotle, Kant, Nietzsche, and the Buddha. The Oxford Handbook of Moral Psychology's fifty chapters, authored by leading figures in the field, cover foundational topics such as character, virtue, emotion, moral responsibility, the neuroscience of morality, weakness of will, and the nature of moral judgments and reasons. The volume also canvases emerging work in applied moral psychology, including adaptive preferences, animals, mental illness, poverty, marriage, race, bias, and victim blaming. Collectively, the essays form the definitive survey of contemporary moral psychology.

What Would You Do Alone in a Cage with Nothing but Cocaine? Hanna Pickard, 2026-01-06. A revolutionary new paradigm for understanding addiction. Why do people with addiction use drugs self-destructively? Why don't they quit out of self-concern? Why does the rat in the experiment alone in a cage press the lever again and again for cocaine to the point of death? In this pathbreaking book, Hanna Pickard proposes a new paradigm for understanding the puzzle of addiction. For too long, our thinking has been hostage to a false dichotomy: either addiction is a brain disease or it is a moral failing. Pickard argues that it is neither and that both models stifle addiction research and fail people who need help. Drawing on her expertise as an academic philosopher and her clinical work in a therapeutic community, Pickard explores the meaning of drugs for people with addiction and the diverse factors that keep them using despite the costs. People use drugs to cope with suffering but also to self-harm or even to die. Some identify as addicts while others are in denial or struggle with cravings and self-control. Social, cultural, and economic circumstances are crucial to explaining addiction, but brain pathology may also matter. By integrating addiction science with philosophy, clinical practice, and the psychology and voices of people with addiction themselves, Pickard shows why there is no one-size-fits-all theory or ethics of addiction. The result is a heterogeneous and humanistic paradigm for understanding and treating addiction and a fresh way of thinking about responsibility, blame, and relationships with people who use drugs.

Hypocrisy Béla Szabados, Eldon Soifer, 2004-05-10. What is a hypocrite? What role does hypocrisy play in our lives? Why is it thought to be such an ugly vice? Is it ever acceptable? What do we lose in our indifference to it? *Hypocrisy: Ethical Investigations* seeks to illuminate the concept of hypocrisy by exploring its multiple roles in our moral and political lives and struggles. The authors provide a

critical examination of a wide range of perspectives on the nature varieties and significance of hypocrisy arguing that it is a key concept in the investigation of the field of morality in general including its moralizing excesses **Sporting**

Reflections Heather Sheridan, Leslie Howe, Keith Thompson, 2007 Part of the Sport Culture and Society series this book aims to illuminate the contribution of philosophy of sport to the understanding of contemporary sport It addresses some of the different fields of philosophy and their application in philosophy of sport including aesthetics ethics philosophy of education and more **The Adam Smith Review Volume 6** Fonna Forman-Barzilai, 2012-08-06 Adam Smith's contribution to

economics is well recognized but in recent years scholars have been exploring anew the multidisciplinary nature of his works The Adam Smith Review is a refereed annual review that provides a unique forum for interdisciplinary debate on all aspects of Adam Smith's works his place in history and the significance of his writings to the modern world It is aimed at facilitating debate between scholars working across the humanities and social sciences thus emulating the reach of the Enlightenment world which Smith helped to shape The sixth volume of the series contains contributions from specialists across a range of disciplines including Vivienne Brown Maria Alejandra Carrasco Douglas J Den Uyl John Elster Niall Ferguson Samuel Fleischacker Christel Fricke Lisa Hill Duncan Kelly Karl Ove Moene John O'Neill Maria Pia Paganelli Alessandro Roncaglia Carola Freiin von Villiez and Jonathan B Wright Topics examined include Smith and the conditions of a moral society The fate of Anglo American capitalism Smith and Shaftesbury Delusions and Other Irrational Beliefs Lisa Bortolotti, 2009-11-12

Delusions are a common symptom of schizophrenia dementia and other psychiatric disorders Though delusion is commonly defined as a false and irrational belief there is currently a lively debate about whether delusions are really beliefs and indeed whether they are even irrational The book is an interdisciplinary exploration of the nature of delusions It brings together the psychological literature on the aetiology and the behavioural manifestations of delusions and the philosophical literature on belief ascription and rationality The thesis of the book is that delusions are continuous with ordinary beliefs a thesis that could have not only significant theoretical implications for debates in the philosophy of mind and psychology but also practical implications for psychiatric classification and the clinical treatment of subjects with delusions Based on recent work in philosophy of mind cognitive psychology and psychiatry the book offers a comprehensive review of the philosophical issues raised by the psychology of normal and abnormal cognition defends the doxastic conception of delusions and develops a theory about the role of judgements of rationality and self knowledge in belief ascription Social Justice in Practice Juha

Räikkä, 2014-07-08 In this book the practical dimension of social justice is explained using the analysis and discussion of a variety of well known topics These include the relation between theory and practice in normative political philosophy the issue of justice under uncertainty the question of whether we can and should unmask social injustices by means of conspiracy theories the issues of privacy and the right to privacy the issue of how certain psychological states may affect our moral obligations in particular the obligation to treat others fairly and finally the concepts of morality fairness and self deception

The primary goal of the book is to provide readers with an updated discussion of some important and practical social justice issues. These issues are presented from a new perspective based on the author's research. It is hoped that bringing these topics together in a single book will promote the emergence of new insights and challenges for future research. Juha R. Ikk is a professor at the Department of Philosophy at the University of Turku, Finland. His research focuses on ethics and political philosophy.
