Self Regulated Learning An Application Of Critical Educational Psychology:

Self-regulated Learning Stephen Vassallo, 2013 **Psychology in Education** Tim Corcoran, 2014-05-13 Psychology's contribution to education has produced a persuasive and burgeoning literature willing to measure e.g. intelligence quotients, categorise e.g. learning and/or behavioural difficulties and pathologise e.g. psychiatric disorders students across learning contexts. Practices like these pervade relationships existing between psychology and education because they share in common certain views of people and the worlds in which they learn. There is however increased acknowledgement that contemporary practice demands alternate ways of working. As learning communities and educators endeavour to make a difference in people's lives they are critically questioning how their use of psychology in education constitutes future possibilities for personhood and psychosocial action. In this book a group of respected international scholars examine controversies presently facing the enduring relationship between psychology and education. The book will appeal to readers who are interested in the innovative development and application of psychological theories and practices in to education. The book will be of interest to transnational audiences and is accessible to scholars and students in disciplines including psychology, education, sociology, social work, youth studies, public and allied health. The volume includes contributions from Tom Billington, Christopher Boyle, Lise Bird, Claiborne, Tim Corcoran, Greg Goodman, Jack Martin, Athanasios Marvakis and Ioanna Petritsi, Jace Pillay, Isaac Prilleltensky, Anna Stetsenko, Jeff Sugarman and Stephen Vassallo with a Foreword by Ben Bradley. Tim Corcoran is Senior Research Fellow and Senior Lecturer in Critical Psychology at The Victoria Institute, Victoria University, Melbourne, Australia. He has extensive experience in educational psychology both as a school psychologist and researcher/academic. His work has involved teaching research and professional practice in Australia, the UK, Singapore and Iraq.

Applications of Self-Regulated Learning across Diverse Disciplines Héfer Bembenutty, Anastasia Kitsantas, Timothy J. Cleary, 2013-03-01 Through its research to practice focus, this book honors the professional contributions of Professor Barry J. Zimmerman as illustrated by the recent self-regulation applications of a highly respected group of national and international scholars. This book will serve as a valuable resource for those interested in empowering and enabling learners to successfully manage and self-direct their lives, education and careers. In particular, K-12 educators, college instructors, coaches, musicians, health care providers and researchers will gain invaluable insight into the nature of self-regulation as well as how they can readily apply self-regulation principles into their teaching, instruction or mentoring. Emergent trends in education and psychology circles such as linking self-regulated learning, assessment and interventions as well as the use of technology to enhance student learning and self-regulation are additional themes addressed in the book. The kaleidoscope of self-regulation issues addressed in this book along with the wide range of promising intervention applications should also prove to be particularly appealing to graduate students as they pursue their future research activities and seek to optimize their individual growth and development.

Critical Educational Psychology Stephen

Vassallo,2017-03-15 The field of critical studies recognizes that all knowledge is deeply embedded in ideological cultural political and historical contexts Although this approach is commonly applied in other subfields of psychology educational psychology has resisted a comprehensive critical appraisal In Critical Educational Psychology stephen Vassallo seeks to correct this deficit by demonstrating hw the psychology of learning is neither neutral nor value free but rather bound by a host of contextual issues and assumptions Vassallo invites educators researchers and psychologists to think broadly about the implications that their use of psychology has on the teaching and learning process He applies a wide variety of interdisciplinary approaches to examine the psychology of learning cognitive development motivation creativity discipline and attention drawing on multiple perspectives within psychology and critical theory he reveals that contemporary educational psychology is entangled in and underpinned by specific political ideological historical and cultural contexts Book cover
