Our Invisible Bodies Scientific Evidence For Subtle Bodies:

Our Invisible Bodies Jay Alfred, 2007-02-13 What has plasma and dark matter got to do with your afterlife In 2005 Jay proposed that dark matter which comprises about 85 per cent of the matter in the universe could include self interacting dark plasma Subsequently this proposal received support in the scientific literature This has significant implications not only for the universe as a whole but also planet Earth and its inhabitants In recent years scientists have pointed out to the life like characteristics of plasma How has this life like dark plasma participated in human evolution Does dark plasma provide the physical basis for your afterlife Do we have plasma bodies which co evolved endosymbiotically with our ordinary matter bodies but are currently invisible to us This book explores this in detail while adhering to experimental data with some surprising conclusions Highlighted readers comments I have read several books over the years on this theme of correlating science with spirit They include The Tao of Physics and more recently The Divine Matrix This masterpiece by Jay Alfred however is one of the best because it explores deeper and more passionately than the others A riveting read and in my opinion this book should be a best seller There s nothing parapsychological paranormal about it we just haven t had the science to explain it until now I ve been reading all three of Jay Alfred s books and so far I ve seriously enjoyed all of them I actually haven t been able to put them down The first few pages are worth the price of this book **Legends of the Fire**

Spirits Robert Lebling, 2010-07-30 An energy a pulse form of quantum physics perhaps alive at the margins of sleep or madness and more often in the whispering of a single unwelcome thought The Economist According to Islamic tradition Allah created three types of beings angels made of light humans made of earth and jinn made of smokeless fire Supernatural shape shifting intelligent and blessed with free will and remarkable powers jinn have over the ages been given many names demon spirit ghouel genie ifrit and shaitan Neither human nor immortal they roam the earth inhabiting dark and empty places luring humans to their deaths or demonically possessing them if harmed or offended Despite the fact they cannot be seen jinn are said to be strangely human like marrying bearing children forming communities and tribes eating sleeping playing and facing judgement like any other human They are ever present partners in the human experience causing endless mischief providing amazing services and sometimes inducing sheer terror Believed in by hundreds of millions of people throughout the world and from all faiths jinn have played a particularly central role in the literature culture and belief systems of the Middle East and the Islamic world Legends of the Fire Spirits explores through time and across nations the enduring phenomenon of the jinn From North Africa to Central Asia from the Mediterranean to sub Saharan Africa and beyond this riveting often chilling yet reasoned book draws on long forgotten ancient testimonies medieval histories colonial records anthropologist s reports and traveller s tales to explore the different types of jinn their behaviour society culture and long history of contact with humankind It documents their links with famous figures in history such as King Solomon and the Queen of Sheba and illustrates the varied and vivid portrayals of jinn in world literature In essence Legends of the Fire Spirits demonstrates the

colourful diversity of human culture and the durability of faith and is a magnificent and indispensable portrayal of the rich folklore of the Islamic world

Tuning the Human Biofield

Eileen Day McKusick, 2021-09-07 Provides a precise map of the energetic biofield that surrounds the body showing where specific emotions memories traumas and pain are stored Details how to locate stored trauma in the biofield with a tuning fork and clear it Winner of the 2015 Nautilus Silver Award When Eileen McKusick began offering sound therapy in her massage practice she soon discovered she could use tuning forks to locate and hear disturbances in the energy field or biofield that surrounded each of her clients Passing the tuning forks through these areas in the biofield not only corrected the distorted vibrational sounds she was hearing but also imparted consistent predictable and sometimes immediate relief from pain anxiety insomnia migraines depression fibromyalgia digestive disorders and a host of other complaints Now more than 20 years later McKusick has fully developed her sound healing method which she calls Biofield Tuning and created a map of the biofield revealing the precise locations where specific emotions memories ailments and traumas are stored In this book

McKusick explains the basics of Biofield Tuning practice and provides illustrations of her Biofield Anatomy Map. She details how to use tuning forks to find and clear pain and trauma stored in the biofield and reveals how the traditional principles and locations of the chakras correspond directly with her biofield discoveries. Exploring the science behind Biofield Tuning, she examines scientific research on the nature of sound and energy and explains how experiences of trauma produce pathological oscillations in the biofield, causing a breakdown of order, structure, and function in the body. Offering a revolutionary perspective on mind, energy, memory, and trauma, McKusick's guide to Biofield Tuning provides new avenues of healing for energy workers, massage therapists, sound healers, and those looking to overcome chronic illness and release the traumas of their past.

Picturing Aura Jeremy Stolow, 2025-04-01. The remarkable history of efforts to visualize the human aura and the lives of its pictures in religion, science, art, and culture. Picturing Aura is the first book of its kind: an extended historical, anthropological, and philosophical study of modern efforts to visualize the hidden, radiant force encompassing the living body, known as our aura. This rich interdisciplinary study by Jeremy Stolow chronicles the rise and global spread of modern instruments and techniques of picturing aura from the late nineteenth century to the present day, exploring how its images are put to work in the diverse realms of psychical research, esotericism, art, photography, popular culture, and the New Age alternative medical and spiritual marketplace. At their core, pictures of auras are boundary objects that operate simultaneously in multiple conceptual and practical realms, serving varying goals of making art, healing bodies, and exploring the cosmos. Drawing on extensive archival as well as field research, Stolow reconstructs a global history of this boundary-crossing enterprise through its evolving media, technologies, markets, and cultural arenas. It is a story shaped through exchanges among professionals and amateurs, scientists and occultists, countercultural artists and entrepreneurs, metropolitans and hinterland figures. With more than 60 full-color illustrations, Picturing Aura brings to light a remarkable, entangled history of picture-making that challenges settled assumptions about religion, art, and science.

Embodied Imaginations Chidambaram Ramesh, 2023-06-05. The science behind the writer's experience of characters developing their own will and taking objective forms. Many writers have the experience that their characters have evolved their own personalities. They start to tell their own stories, and sometimes they could even rebel against the author's ideas for them and change the course of the whole plot. That is not all, though. Sometimes literary characters assume objective appearances which are visible not just to the creators but also to others and manifesting in the real world. These experiences raise several interesting philosophical and scientific questions: Have the writers unwittingly created quasi-conscious entities by the power of their minds? Can thoughts manifest as something tangible that can be seen, heard, or even touched? How genuine are the contents of the mind? Embodied Imaginations explores these questions, highlighting the results of an investigation on this fascinating topic stemming from personal anecdotes of many writers. Providing scientific evidence for the existences of these mental constructs, the goal is to collect robust and reliable building blocks that may help to deconstruct perceptions and

provide answers to this phenomenon The book attempts to give modern science a place where spiritual philosophical and mystical threads can be interwoven Efforts have been made to corroborate theoretical claims with experimental evidence contributing to research in cognitive psychology to determine the role of imagination in creating external reality This book will introduce you to the mysterious and profound part of creative writing that you never knew existed before Quantum DNA Healing Althea S.
