**Uncovering the Pearl** Amos Yong, Mark A. Lamport, Timothy T. N. Lim, 2023-09-19 Asia is by far the largest continent in the world The global expansion of the church which emanated from the Middle East as explored in the first book in the series moved along various routes to take root in Asia proper Christianity in Asia is extraordinarily diverse with very ancient forms of the faith dating to the time of the apostles The western church will be enlightened by the dynamic multi pronged Asian story of Christianity Asian Christianity is also distinct due to the numerous non traditional house or cell movements found throughout the region The diversity of Christianity in Asia makes Christians in this region critical for the future of global Christianity

**Ecocriticism of the Global South** Scott Slovic, Swarnalatha Rangarajan, Vidya Sarveswaran, 2015-03-24 The vast

majority of existing ecocritical studies even those which espouse the postcolonial ecocritical perspective operate within a first world sensibility speaking on behalf of subalternized human communities and degraded landscapes without actually eliciting the voices of the impacted communities Ecocriticism of the Global South seeks to allow scholars from or intimately familiar with underrepresented regions to write back to the world's centers of political and military and economic power expressing views of the intersections of nature and culture from the perspective of developing countries This approach highlights what activist and writer Vandana Shiva has described as the relationship between ecology and the politics of survival showing both commonalities and local idiosyncrasies by juxtaposing such countries as China and Northern Ireland New Zealand and Cameroon Much like *Ecoambiguity Community and Development* this new book is devoted to representing diverse and innovative ecocritical voices from throughout the world particularly from developing nations The two volumes complement each other by pointing out the need for further cultivation of the environmental humanities in regions of the world that are essentially the front line of the human struggle to invent sustainable and just civilizations on an imperiled planet
