Out Of The Mainstream Water Rights Politics And Identity:

Out of the Mainstream Rutgerd Boelens, David Getches, Armando Guevara-Gil, 2010-02-26 Water is not only a source of life and culture. It is also a source of power, conflicting interests, and identity battles. Rights to materially access, culturally organize, and politically control water resources are poorly understood by mainstream scientific approaches and hardly addressed by current normative frameworks. These issues become even more challenging when law and policy makers and dominant power groups try to grasp, contain, and handle them in multicultural societies. The struggles over the uses, meanings, and appropriation of water are especially well illustrated in Andean communities and local water systems of Peru, Chile, Ecuador, and Bolivia, as well as in Native American communities in south western USA. The problem is that throughout history, these nation states have attempted to civilize and bring into the mainstream the different cultures and peoples within their borders, instead of understanding context and harnessing the strengths and potentials of diversity. This book examines the multi-scale struggles for cultural justice and socio-economic redistribution that arise as Latin American communities and user federations seek access to water resources and decision-making power regarding their control and management. It is set in the dynamic context of unequal globalizing power relations, politics of scale, and identity, environmental encroachment, and the increasing presence of extractive industries that are creating additional pressures on local livelihoods. While much of the focus of the book is on the Andean Region, a number of comparative chapters are also included. These address issues such as water rights and defence strategies in neighbouring countries and those of Native American people in the southern USA, as well as state reform and multi-culturalism across Latin and Native America, and the use of international standards in struggles for indigenous water rights. This book shows that against all odds, people are actively contesting neoliberal globalization and water power plays. In doing so, they construct new hybrid water rights systems, livelihoods, cultures, and hydro-political networks, and dynamically challenge the mainstream powers and politics.

Water Security, Justice and the Politics of Water Rights in Peru and Bolivia Miriam Seemann, 2016-04-08 The author scrutinizes the claim of policy makers and experts that legal recognition of local water rights would reduce water conflict and increase water security and equality for peasant and indigenous water users. She analyzes two distinct top-down and bottom-up formalization policies in Peru and Bolivia: neoliberal the former, indigenist socialist the latter. The policies have intended and unintended consequences and impact on marginalized peasants and the complex inter-legal systems for providing water security on the ground. This study seeks to debunk the official myth of the need to create state-centric top-down legal security in complex pluralistic water realities. The engagement between formal and alternative water securities and controversial notions of rightness is interwoven and contested. A complex setting is unveiled that forbids one-size-fits-all solutions. Peru's and Bolivia's case studies demonstrate how formalization policies while aiming to enhance inclusion in practice actually reinforce exclusion of the marginalized. Water rights formalization is certainly no panacea.

water has been adopted by the United Nations as a basic human right Yet how such universal calls for a right to water are understood negotiated experienced and struggled over remain key challenges The Right to Water elucidates how universal calls for rights articulate with local historical geographical contexts governance politics and social struggles thereby highlighting the challenges and the possibilities that exist Bringing together a unique range of academics policy makers and activists the book analyzes how struggles for the right to water have attempted to translate moral arguments over access to safe water into workable claims This book is an intervention at a crucial moment into the shape and future direction of struggles for the right to water in a range of political geographic and socio economics contexts seeking to be pro active in defining what this struggle could mean and how it might be taken forward in a far broader transformative politics The Right to Water engages with a range of approaches that focus on philosophical legal and governance perspectives before seeking to apply these more abstract arguments to an array of concrete struggles and case studies In so doing the book builds on empirical examples from Africa Asia Oceania Latin America the Middle East North America and the European Union

Water, Power and Identity Rutgerd Boelens,2015-04-10 This book addresses two major issues in natural resource

management and political ecology the complex conflicting relationship between communities managing water on the ground and national global policy making institutions and elites and how grassroots defend against encroachment question the self evidence of State market based water governance and confront coercive and participatory boundary policing normal vs abnormal The book examines grassroots building of multi layered water rights territories and State market and expert networks vigorous efforts to reshape these water societies in their own image seizing resources and or aligning users identities and rights systems within dominant frameworks Distributive and cultural politics entwined It is shown that attempts to modernize and normalize users through universalized water culture rational water use and de politicized interventions deepen water security problems rather than alleviating them However social struggles negotiate and enforce water rights User collectives challenge imposed water rights and identities constructing new ones to strategically acquire water control autonomy and re moralize their waterscapes The author shows that battles for material control include the right to culturally define and politically organize water rights and territories Andean illustrations from Peru Ecuador Bolivia and Chile from peasant indigenous life stories to international policy making highlight open and subsurface hydro social networks They reveal how water justice struggles are political projects against indifference and that engaging in re distributive policies and defying truth politics extends context particular water rights definitions and governance forms

Water Ethics David Groenfeldt, 2019-02-21 Fully revised and updated this second edition of Water Ethics continues to consolidate water ethics as a key dimension of water related decisions The book introduces the idea that ethics are an intrinsic dimension of any water policy program or practice and that understanding what ethics are being acted out in water policies is fundamental to an understanding of water resource management Alongside updated references and the introduction of discussion questions and recommended further reading this new edition discusses in depth three significant developments since the publication of the first edition in 2013 The first is the growing awareness of the climate crisis as an existential threat and associated concern about adaptive strategies for sustainable water management and ways of using water management for climate mitigation e g practically through agricultural soil management and conceptually through ethics awareness Second there has been increased clarity among the religious community Indigenous leaders and progressive academics that ethics needs to become an arena for application and action e g the Vatican encyclical Laudato Si protests at Standing Rock and Flint Michigan in the US and climate demonstrations worldwide Thirdly there have been new normative water standards ranging from water stewardship industry initiative water charters Berlin and the on going initiative to develop a global water ethics charter Drawing on case studies from countries including Australia India the Philippines South Africa and the United States this textbook is essential reading for students of environmental ethics and water governance and management

Environmental Anthropology Helen Kopnina, Eleanor Shoreman-Ouimet, 2013-07-18 This volume presents new theoretical approaches methodologies subject pools and topics in the field of environmental anthropology Environmental anthropologists are

increasingly focusing on self reflection not just on themselves and their impacts on environmental research but also on the reflexive qualities of their subjects and the extent to which these individuals are questioning their own environmental behavior Here contributors confront the very notion of natural resources in granting non human species their subjectivity and arguing for deeper understanding of nature and wilderness beyond the label of ecosystem services By engaging in interdisciplinary efforts these anthropologists present new ways for their colleagues subjects peers and communities to understand the causes of and alternatives to environmental destruction This book demonstrates that environmental anthropology has moved beyond the construction of rural small group theory entering into a mode of solution based methodologies and interdisciplinary theories for understanding human environmental interactions It is focused on post rural existence health and environmental risk assessment on the realm of alternative actions and emphasizes the necessary steps towards preventing environmental crisis

Oil and National Identity in the Kurdistan Region of Iraq Alessandro Tinti, 2011-11-29 Examining the interplay between the oil economy and identity politics using the Kurdistan Region of Iraq as a case study this book tells the untold story of how extractivism in the Kurdish autonomous region is interwoven in a mosaic of territorial disputes simmering ethnic tensions dynastic rule party allegiances crony patronage and divergent visions about nature Since the ousting of Saddam Hussein the de facto borders of the Kurdistan Region of Iraq have repeatedly changed with energy interests playing a major role in such processes of territorialisation However relatively little research exists on the topic This book provides a timely empirical analysis of the intersections between extractive industries oil imaginaries and identity formation in one of the most coveted energy frontiers worldwide It shines a light on relations between the global production networks of petro capitalism and extractive localities Besides the strained federal relationship with the Iraqi central government the transformative effects the petroleum industry has had on Kurdish society are also explored in depth Moreover the book fills a gap in the literature on Kurdish Studies which has devoted scant attention to energy related issues in the re imagination of Kurdish self determination This book will be of great interest to students and scholars of the extractive industries energy studies conflict studies Middle Eastern politics and political ecology

Water and Social Policy M. Pawar, 2014-01-22 Manohar Pawar discusses the relevance and importance of social policy for water issues By analysing several interrelated perspectives on water he suggests core values as bases for formulating and implementing social policies so as to provide universal free access to safe drinking water for all particularly for the most poor and disadvantaged
