CAUTION: To prevent the risk of fire or electric shock, install in a temperature and humidity controlled indoor area free of conductive contaminants. (See the specifications for the acceptable temperature and humidity range.)

CAUTION: Do not attach non-computer-related items, such as medical equipment, life-support equipment, microwave ovens, or vacuum cleaners to UPS.

CAUTION: Do not plug the UPS input into its own output.

CAUTION: Do not allow liquids or any foreign object to enter the UPS. (Do not place beverages or any other liquid-containing vessels on or near the unit.)

CAUTION: In the event of an emergency, press the OFF button and disconnect the power cord from the AC power supply to properly disable the UPS.

OVERVIEW

The Office Pro G2 1000VA/1500VA/2000 VA provides automatic voltage regulation for independent utility power, and battery backup during power outages. The Office Pro G2 1000VA/1500VA/2000 VA ensures consistent power to your computer system and its included software will automatically save your open files and shutdown your computer system during a utility power loss.

HOW TO DETERMINE THE POWER REQUIREMENTS OF YOUR EQUIPMENT

1. Insure that the equipment plugged into the battery power-supplied outlets does not exceed the UPS unit's rated capacity. If rated unit capacities are exceeded, an overvoltage condition may occur and cause the UPS unit to shut down or the circuit breaker to trip.
2. There are many factors that can affect the amount of power that your computer system will require. For optimal system performance keep the attached load below 80% of the UPS's rated capacity.

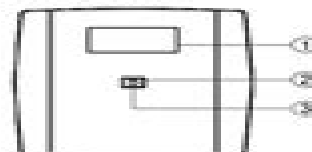

HARDWARE INSTALLATION GUIDE

1. Your new UPS may be used immediately upon receipt. However, recharging the battery for at least 8 hours is recommended to ensure that the battery's maximum charge capacity is achieved. Charge lines may occur during shipping and storage. To recharge the battery, plug the UPS into an AC outlet. The unit will charge in both the on and off position.
2. With the UPS turned off and unplugged, connect the computer, monitor, and any equipment into the battery power supplied outlets. **DO NOT plug a laser printer, copier, space heater, vacuum, power shaver or other large electrical device into the battery power supplied outlets. The power demands of these devices will overload and possibly damage the unit.**
3. Plug the UPS into a 120V, 3 wire grounded receptacle (wall outlet). Make sure the wall branch outlet is protected by a fuse or circuit breaker and does not service equipment with large electrical demands (e.g. air conditioner, refrigerator, copier, etc.) Avoid using extension cords.
4. Depress the power switch to turn the UPS on. The power on indicator light will illuminate and the UPS will "beep".
5. If an overload is detected, an audible alarm will sound and the UPS will emit one long beep. To correct this, turn the UPS off and unplug at least one piece of equipment from the battery power supplied outlets. Wait 15 seconds. Make sure the circuit breaker is depressed and then turn the UPS on.

6. To maintain optimal battery charge, leave the UPS plugged into an AC outlet at all times.
7. To store your UPS for an extended period, cover it and store with the battery fully charged. Recharge the battery every three months to ensure battery life.
