Haller (Jr.), 1995 *Het einde van vooroordelen* Jessica Nordell, 2023-03-16 Standaardwerk inclusiviteit en diversiteit Voor de lezers van Kahneman en Haidt Vooroordelen vormen een van de grootste problemen van deze tijd zowel maatschappelijk persoonlijk als professioneel Jessica Nordell schreef het standaardwerk om onbewuste vooroordelen te herkennen en blijvend te veranderen Nordell beschrijft hoe vooroordelen werken hoe we anders leren denken en hoe we deze verandering kunnen bestendigen Het boek is uniek in zijn soort het is breder genuanceerder en meer onderbouwd dan wat er tegenwoordig verschijnt over discriminatie racisme en gender Een baanbrekende analyse van vooroordelen en hoe we die kunnen voorkomen The Guardian

Measuring Manhood Melissa N. Stein, 2015-09-01 From the gay gene to the female brain and African American students insufficient hereditary background for higher education arguments about a biological basis for human difference have reemerged in the twenty first century Measuring Manhood shows where they got their start Melissa N Stein analyzes how race became the purview of science in nineteenth and early twentieth century America and how it was constructed as a biological phenomenon with far reaching social cultural and political resonances She tells of scientific experts who advised the nation on its most pressing issues and exposes their use of gender and sex differences to conceptualize or buttress their claims about racial difference Stein examines the works of scientists and scholars from medicine biology ethnology and other fields to trace how their conclusions about human difference did no less than to legitimize sociopolitical hierarchy in the United States Covering a wide range of historical actors from Samuel Morton the infamous collector and measurer of skulls in the 1830s to NAACP leader and antilynching activist Walter White in the 1930s this book reveals the role of gender sex and sexuality in the scientific making and unmaking of race

Race in Psychoanalysis Celia Brickman, 2017-12-06 Race in Psychoanalysis analyzes the often unrecognized racism in psychoanalysis by examining how the colonialist discourse of late nineteenth century anthropology made its way into Freud's foundational texts where it has remained and continues to exert a hidden influence Recent racial violence particularly in the US has made many realize that academic and professional disciplines as well as social and political institutions need to be re-examined for the racial biases they may contain Psychoanalysis is no exception When Freud applied his insights to the history of the psyche and of civilization he made liberal use of the anthropology of his time which was steeped in colonial racist thought

Although it has often been assumed that this usage was confined to his non clinical works this book argues that through the pivotal concept of primitivity it fed back into his theories of the psyche and of clinical technique as well Celia Brickman examines how the discourse concerning the presumed primitivity of colonized and enslaved peoples contributed to psychoanalytic understandings of self and raced other She shows how psychoanalytic constructions of race and gender are related and how Freud's attitudes towards primitivity were related to the anti-Semitism of his time All of this is demonstrated to be part of the modernist aim of psychoanalysis which seeks to create a modern subjectivity through a renegotiation of the past Finally the book shows how all of this can affect both clinician and patient within the contemporary clinical encounter

Race in Psychoanalysis is a pivotal work of significance for scholars practitioners and students of psychoanalysis psychologists clinical social workers and other clinicians whose work is informed by psychoanalytic insights as well as those engaged in critical race and postcolonial studies

Idea of Race in Science Nancy Stepan, 1982-06-18 **Embodying Inequality** Nancy Krieger, 2016-12-05 To advance the epidemiological analysis of social inequalities in health and of the ways in which population distributions of disease disability and death reflect embodied expressions of social inequality this volume draws on articles published in the International Journal of Health Services between 1990 and 2000 Framed by ecosocial theory it employs ecosocial constructs of embodiment pathways of embodiment cumulative interplay of exposure susceptibility and resistance across the lifecourse and accountability and agency to address the question and who and what drives current and changing patterns of social inequalities in health

The Comparative Reception of Darwinism Thomas F. Glick, 1988-09-24 The majority of the chapters deal with the reception accorded Darwin's work in specific countries England the United States Germany France Russia the Netherlands Spain Mexico and the Arab countries Several chapters however also investigate the response to Darwinism made by specific social circles such as social scientists in Russia and the United States

Race and Intelligence Jefferson M. Fish, 2013-05-13 In recent years reported racial disparities in IQ scores have been the subject of raging debates in the behavioral and social sciences and education What can be made of these test results in the context of current scientific knowledge about human evolution and cognition Unfortunately discussion of these issues has tended to generate more heat than light Now the distinguished authors of this book offer powerful new illumination Representing a range of disciplines psychology anthropology biology economics history philosophy sociology and statistics the authors review the concept of race and then the concept of intelligence Presenting a wide range of findings they put the experience of the United States so frequently the only focus of attention in global perspective They also show that the human species has no races in the biological sense though cultures have a variety of folk concepts of race that there is no single form of intelligence and that formal education helps individuals to develop a variety of cognitive abilities Race and Intelligence offers the most comprehensive and definitive response thus far to claims of innate differences in intelligence among races
