The Bible's Redemption Pattern and Numeric Map Norm Patriquin,2009-03 Using geographic information systems to define and map commuting patterns as inputs to agent-based models David P. Chrest,William D. Wheaton,2009-05-31 By understanding the movement patterns of people mathematical modelers can develop models that can better analyze and predict the spread of infectious diseases People can come into close contact in their workplaces This report describes methods to develop georeferenced commuting patterns that can be used to characterize the work related movement of US populations and help agent based modelers predict workplace contacts that result in disease transmission We used a census data product called Census Spatial Tabulation Census Tract of Work by Census Tract of Residence STP64 as the data source to develop commuting pattern data for agent based synthesized populations databases and to develop map products to visualize commuting patterns in the United States The three primary maps we developed show inbound outbound and net change levels of inbound versus outbound commuters by census tract for the year 2000 Net change counts of commuters are visualized as elevations The results can be used to quantify and assign commuting patterns of synthesized populations among different census tracts Map Skills - The World (ENHANCED eBook) R. Scott House,Patti M. House,2010-09-01 Explore the varied features of the world while reinforcing basic map reading skills Sixteen student pages and accompanying blackline and full color maps coordinate to provide a relational study of the elevation vegetation products population and peoples of the world Full color maps are provided as transparencies for print books and PowerPoint slides for eBooks Student pages challenge students to combine maps and additional resources in order to answer questions and make judgments Question topics follow the Five Themes of Geography as outlined by the National Geographic Society finding absolute and relative locations on a map relating physical and human characteristics to an area understanding human relationships to the environment tracing movement of peoples and goods throughout an area and organizing countries and continents into regions for detailed study Small-Scale Map Projection Design Frank Canters,2002-02-21 The use of computers in cartography has made it easier for map makers to transform data from one map projection to another and experiment with alternative representations of geographical data This has created new challenges and opportunities for map projection scientists Small Scale Map Projection Design focuses on numerical map projection research and is written from the perspective of the map projection user It demonstrates how advances in the measurement of map projection distortion and in the development of low error map projections can help map makers decide what type of map projection is best for their purpose and shows how they can eventually design their own map projections **Software Patterns, Knowledge Maps, and Domain Analysis** Mohamed E.
