C. Greig Crysler, Stephen Cairns, Hilde Heynen

Rethinking Technology A Reader In Architectural Theory:

Rethinking Technology William W. Braham, Jonathan A. Hale, 2006-12-05 This essential reference for all students of architecture design and the built environment provides a convenient single source for all the key texts in the recent literature on architecture and technology The book contains over fifty carefully selected essays manifestoes reflections and theories by architects and architectural writers from 1900 to 2004 This mapping out of a century of architectural technology reveals the discipline's long and close attention to the experience and effects of new technologies and provides a broad picture of the shift from the age of tools to the age of systems Chronological arrangement and cross referencing of the articles enable both a thematic and historically contextual understanding of the topic and highlight important thematic connections across time With the ever increasing pace of technological change this Reader presents a clear understanding of the context in which it has and does affect architecture

The SAGE Handbook of Architectural Theory C. Greig Crysler, Stephen Cairns, Hilde Heynen, 2012-01-20 Offers an intense scholarly experience in its comprehensiveness its variety of voices and its formal organization the editors took a risk experimented and have delivered a much needed resource that upends the status quo Architectural Histories journal of the European Architectural History Network Architectural theory interweaves interdisciplinary understandings with different practices intentions and ways of knowing This handbook provides a lucid and comprehensive introduction to this challenging and shifting terrain and will be of great interest to students academics and practitioners alike Professor Iain Borden UCL Bartlett School of Architecture In this collection architectural theory expands outward to interact with adjacent discourses such as sustainability conservation spatial practices virtual technologies and more We have in *The Handbook of Architectural Theory* an example of the extreme generosity of architectural theory It is a volume that designers and scholars of many stripes will welcome K Michael Hays Eliot Noyes Professor of Architectural Theory Harvard University *The SAGE Handbook of Architectural Theory* documents and builds upon the most innovative developments in architectural theory over the last two decades Bringing into dialogue a range of geographically institutionally and historically competing positions it examines and explores parallel debates in related fields The book is divided into eight sections Power Difference Embodiment Aesthetics Pleasure Excess Nation World Spectacle History Memory Tradition Design Production Practice Science Technology Virtuality Nature Ecology Sustainability City Metropolis Territory Creating openings for future lines of inquiry and establishing the basis for new directions for education research and practice the book is organized around specific case studies to provide a critical interpretive and speculative enquiry into the relevant debates in architectural theory

The Dissertation Iain Borden, Katerina Rüedi Ray, 2014-05-09 The Dissertation is one of the most demanding yet potentially most stimulating components of an architectural course This classic text provides a complete guide to what to do how to do it when to do it and what the major pitfalls are This is a comprehensive guide to all that an architecture student might need to know about undertaking the dissertation The book

provides a plain guide through the whole process of starting writing preparing and submitting a dissertation with minimum stress and frustration The third edition has been revised throughout to bring the text completely up to date for a new generation of students Crucially five new and complete dissertations demonstrate and exemplify all the advice and issues raised in the main text These dissertations are on subjects from the UK USA Europe and Asia and offer remarkable insights into how to get it just right

Bringing the World Into Culture Piet Lombaerde,2010 This book is published on the occasion of the emeritus status awarded to Professor Richard Foque ir arch MSc His successful career as founder and partner of an architect firm professor in design theory and Head of the Department of Design Science has provided opportunities to meet colleagues both at home and abroad

Architecture in Digital Culture Socrates Yiannoudes,2022-12-14 This book examines the manifestations of architecture cities and design processes within digital culture Adopting a comparative and critical method the author looks at past and present encounters of the digital with architectural discourse and practice Along three central themes machines networks and computation the book begins by discussing transformations of the analogy between architecture and the machine since the early twentieth century foregrounding questions about the relations between architecture humans machines and the environment It moves on to the city to observe how big data and smart city sustainable management systems have transformed historical visions of global networked cities Lastly it explores computational design thinking historically and in the context of complex systems as well as the latest technical social and economic developments Exposing possible drawbacks while still focusing on what is radically innovative this book proposes a way toward more liberating digital and sustainable futures for architecture An important read for architecture students academics and professionals this book connects instances of digital architecture practice and discourse throughout the history of the digital culture paradigm and their ties with sociopolitical developments It shares the possibility that these connecting lines may be the canvas for a novel architectural history of the recent past

Architectural Technology Stephen Emmitt,2013-03-25 it gives me great pleasure to support the first ever publication to specifically address the area of research and in particular its relationship with practice in the discipline of architectural technology not only ground breaking because it is the first book of its kind but also because it provides at long last one of the accepted foundations needed to underpin the emerging academic discipline namely a recognised research base CIAT in

supporting this publication is aware of the need for books such as this to sustain the process of research informed practice as an aid for both students and those practising within the discipline of architectural technology Norman Wienand MCIAT Vice President Education Chartered Institute of Architectural Technologists Architectural technology is the realisation of architecture through the application of building science forming the constructive link between the abstract and the physical Architectural Technology research and practice demonstrates the importance of research in architectural technology and aims to stimulate further research and debate by enlightening informing and challenging readers Chapter authors address the interplay between research and practice in the field of architectural technology examining the influence of political economic social environmental and technological issues The focus throughout is on creating sustainable buildings that are constructed economically and function effectively and efficiently within their service life cycle The book s mix of chapters and case studies bring together a number of different themes and provides invaluable insights into the world of research from the perspective of those working within the architectural technology field practitioners academics and students The underlying message is that architectural technology is not just a profession it is a way of thinking and a way of acting This is highlighted by contributions from architects and architectural technologists passionate about architectural technology as a field of knowledge Contributions range from the theoretical and polemic to the pragmatic and applied further helping to demonstrate the richness of the field About the Editor Stephen Emmitt is Professor of Architectural Technology at Loughborough University UK and Visiting Professor of Innovation Sciences at Halmstad University Sweden and a member of CIAT s Research Group

Architecture as a Performing Art Marcia Feuerstein, Gray Read, 2016-04-15 How do buildings act with people and among people in the performances of life This collection of essays reveals a deep alliance between architecture and the performing arts uncovering its roots in ancient stories and tracing a continuous tradition of thought that emerges in contemporary practice With fresh insight the authors ask how buildings perform with people as partners rather than how they look as formal compositions They focus on actions the door that offers the possibility of making a dramatic entrance the window that frames a scene and the city street that is transformed in carnival The essays also consider the design process as a performance improvised among many players and offer examples of recent practice that integrates theater and dance This collection advances architectural theory history and criticism by proposing the lens of performance as a way to engage the multiple roles that buildings can play without reducing them to functional categories By casting architecture as spatial action rather than as static form these essays open a promising avenue for future investigation For architects the essays propose integrating performance into design through playful explorations that can reveal intense relationships between people and place and among people in place Such practices develop an architectural imagination that intuitively asks How might people play out their stories in this place and How might this place spark new stories Questions such as these reside in the heart of all of the essays presented here Together they open a position in the intersection between

everyday life and staged performance to rethink the role of architectural design *A House in the Sun* Daniel A. Barber, 2016-10-13 *A House in the Sun* describes a number of experiments in solar house heating in the 1940s and 1950s It shows how resource limitations were seen as an opportunity for design to attain new relevance for social and cultural transformations *Architecture and Adaptation* Socrates Yiannoudes, 2016-01-29 *Architecture and Adaptation* discusses architectural projects that use computational technology to adapt to changing conditions and human needs Topics include kinetic and transformable structures digitally driven building parts interactive installations intelligent environments early precedents and their historical context socio cultural aspects of adaptive architecture the history and theory of artificial life the theory of human computer interaction tangible computing and the social studies of technology Author Socrates Yiannoudes proposes tools and frameworks for researchers to evaluate examples and tendencies in adaptive architecture Illustrated with more than 50 black and white images
