

PRODUCT INFORMATION OTICON SAFARI 900, 600 AND 300

Oticon Safari is a complete family of hearing instruments that fits all age groups from infants to teens. The unique needs of all children and young adults can be accommodated with models suitable for mild-moderate to profound hearing losses. A strong audiological concept combined with a robust design and intelligent LED indicator makes Safari perfect for children. A dedicated paediatric fitting mode in Genie makes fitting and counselling even easier.

The power to learn and understand
Language acquisition and classroom learning require natural sound input. With Speech Guard, speech is prioritised and listening effort minimised. It is designed to maintain signal fidelity and uniquely preserves the richness of speech dynamics.

Spatial Noise Management is designed to enhance understanding in complex listening environments like classrooms. In conversations with dominating noise from one side, the ear with the clearest speech signal is automatically prioritised to reduce listening effort and retain speech cues.

The power to connect and interact
The Bluetooth-enabled Streamer and ConnectLine offer fast and easy access to PCs, TVs, music players and phones keeping teens and young children in touch with their world. The input signal can be sent directly into Safari with a single touch of a button.

Safari is designed with FM connectivity from the ground up. Oticon Amigo transmitters and integrated FM receivers connect seamlessly to all Safari models creating the ultimate paediatric solution.

Reliability and certainty
With the visual indicator (LED), parents and teachers can be absolutely sure that the Safari instrument is functioning properly. Blinking light patterns provide information on battery life and instrument status. Safari also has nanocoated surfaces, enhancing its resistance to moisture, sweat and humidity.

Power Without Glory Kenneth Mølbjerg Jørgensen, 2007 Power without Glory demonstrates the use of Foucault's conception of power in organizational analysis It does this in two ways first by developing a method for studying power in organizations namely genealogy and secondly by conducting a case study according to the principles in this method The purpose is to highlight some aspects of Foucault's conception of power which has not been sufficiently explored in organizational analysis Most studies using a Foucauldian framework have focused on the relations between power and surveillance in organizations This book takes a different approach and claims that a sufficient understanding of power is only possible by exploring the links between archaeology genealogy and power This is supported by the fact that Foucault claimed that his conception of power was not really a theory of power but the analytics of power where the aim was to show how power works in practice This point is crucial in that the most exciting aspects of Foucault's concepts and methods have to do with the ways in which they allow one to gain new understandings of reality Such new understandings depend on showing how power works both in constructing truth and in excluding other truths The book discusses how a decision made in a bank is subjected to genealogical scrutiny The research presented covers change processes over a period of more than six years The defining moment of these changes is when management decides to implement a new functional and a new geographical division of labor The case study unravels the history of this decision and its effects on the workforce The case study also shows how the change process evolved the feelings and actions of those involved at the various stages and the different ideas concepts strategies and techniques
