Outcome Based Evaluation:

Outcome-Based Evaluation Robert L. Schalock, 2001 Outcome based evaluation is particularly useful for examining government and social programs where there is no financial bottom line This two part introductory reference provides in Part I an overview of outcome based approach discusses the four types of evaluations it includes Program evaluation to determine person and program referenced outcomes and their use Effectiveness evaluation to determine whether a program meets its stated goals and objectives Impact evaluation to determine whether a program made a difference and Policy evaluation to determine policy outcomes in reference to their equity efficiency or effectiveness Part II focuses on methodology choice of outcomes their measurement and their analysis *Enhancing Performance Regimes to Enable Outcome-based Policy*

Analysis in Cross-boundary Settings Vincenzo Vignieri, 2022-07-26 Over the last two decades the field of public administration has witnessed theoretical and practical changes that have innovated the relationships between public administration and performance management Dealing with the rising complexity of performance regimes in contemporary public administration requires that policy makers and their organizations are able to face unpredictable problems impacting on a community's quality of life Complex policy issues such as immigration pandemics societal aging crime unemployment and financial crises cannot be easily solved by quick fixes that are focused only on a short term and bounded vision of their causes They rather require robust methods to support policy analysis and to affect sustainable community outcomes in cross boundary settings As illustrated in this book Dynamic Performance Management provides a methodological framework enabling policy makers to outline the causal relationships among policy outcomes performance drivers and related strategic resources Such a modeling approach helps stakeholders to broaden the investigated system boundaries so to balance short and long term performance under different result domains This approach blends performance management and System Dynamics modeling Several examples and case studies are discussed to enable scholars and practitioners to appreciate the practical implications related to the use of such an approach Outcome-Based Evaluation Robert L.
