Learn from the Masters! Frank Swetz, 1995 This book is for high school and college teachers who want to know how they can use the history of mathematics as a pedagogical tool to help their students construct their own knowledge of mathematics Often a historical development of a particular topic is the best way to present a mathematical topic but teachers may not have the time to do the research needed to present the material This book provides its readers with historical ideas and insights which can be immediately applied in the classroom The book is divided into two sections the first on the use of history in high school mathematics and the second on its use in university mathematics The articles are diverse covering fields such as trigonometry mathematical modeling calculus linear algebra vector analysis and celestial mechanics Also included are articles of a somewhat philosophical nature which give general ideas on why history should be used in teaching and how it can be used in various special kinds of courses Each article contains a bibliography to guide the reader to further reading on the subject

Leading Schools with Unique Populations Peter R. Litchka, 2019-10-24 This book brings an international perspective of school leadership but this time examines how such leadership can have a positive impact on students considered to be unique At one time such students considered unique or special were often placed in special education programs and or special schools to address their physical emotional and or mental disabilities Through legislation and changes in beliefs many countries have changed approaches with these students from a warehouse approach where such students were placed in special schools to more of an inclusive approach where such students remain in their particular home school in an environment that was more inclusive and less restrictive Over the past two decades or so schools around the globe have been experiencing a significance increase in not only the number of traditional types of students needing special services but a new generation of unique and diverse students including those with sexual identity and orientation differences extreme social and economic inequities cultural differences arising from the significant increase in the number of migrant families fleeing unstable nations Through their educational systems many nations are moving from compliance and deficit models to support and prevention they are becoming more inclusive of unique and special students Thus the school leader if provided the opportunity and support can have a significant impact on the education of and all students by linking their leadership to the acceptance and inclusion of all students and to ensuring that all adults in the school become responsible for each student
