Porsche Turbo Stories:

Porsche Turbo Stories Ing. h. c. F. Porsche AG, 2010-02-28 For 35 years the Porsche 911 Turbo has been regarded quite simply as the automotive icon and dream sports car per se. Its unique combination of performance and luxury enabled it to mature into a classic that has a very special place in the history of Porsche. The seven generations of Turbos reflect as no other model the innovative forces behind the Porsche makes of cars. As a technology carrier with racing genes it introduced numerous technical advances in the field of automobile construction. In the process it not only remained true to its ideas of performance but also corresponded to Ferry Porsche's philosophy: high motor performance accompanied by low consumption. This book contains a comprehensive description of all seven generations of Turbos from 1974 to the present and wide ranging contemporary picture material, graphs and advertisements from the holdings of the Porsche Museum. Published as part of the collectible series of books in the Edition Porsche Museum. English and German text *Porsche Turbo Stories* Dr. Ing. h.c.F. Porsche AG., 2009 Seven Turbo generations have now been introduced and illustrate the Porsche brand's power of innovation more than any other model. As leader in automobile technology they have been introduced many an innovation to the automobile scene. The Turbo has never departed the performance principle or the policy always pursued by Ferry Porsche: high performance, lower consumption. *Porsche Turbo* Randy Leffingwell, 2015-10-23 Celebrate the rebirth of the world's most stunning high performance automobile. Porsche made history when it brought turbocharging to the racing world in the form of the 917. When strict regulations regarding engine displacement took away the option of bigger engines, manufacturers turned to forced induction. In its wildest trim the original 12 cylinder turbocharged Porsche racing engine yielded as much as 1,400 horsepower. Porsche's official philosophy was that racing cars must have a connection to street cars, so it was preordained that Porsche would eventually produce a turbocharged version of its air cooled flat six cylinder engine. The resulting 930 Turbo appeared in the spring of 1975 in Europe. Acceleration from 0 to 100 kilometers per hour took a scant 5.5 seconds and its top speed was 155 miles per hour. The Turbo's distinctive rear wing let the world know that this was something very special. It was nothing less than the rebirth of the high performance automobile. At a time when the big block engines in America's so called muscle cars were putting out 180 horsepower and the engines in exotic supercars weren't much more ambitious, the lightweight Porsche was a genuine rocket. *Porsche Turbo: The Inside Story of Stuttgart's Turbocharged Road and Race Cars* celebrates Porsche's five decades of turbocharged supercar performance, both on the track and on the street. It covers all of the major racing cars as well as the turbocharged street cars including the 930, 935, 924, 944, 968, 911 and Cayenne Panamera. Don't let this one fly past you.
