Port Economics Volume 16 Research In Transportation Economics:

Port Economics Wayne K. Talley, 2009-05-07 Port Economics is the study of the economic decisions and their consequences of the users and providers of port services A port is an engine for economic development by providing employment worker incomes business earnings and taxes for its region The book provides a detailed discussion of types of carriers that use ports the operation of cargo and passenger ports as well as the operation of such specific ports as Hong Kong Hamburg Le Havre Savannah Miami and Panama Port Economics is the first contemporary textbook of its kind It enhances our understanding of port economics by classifying port users and suppliers of port services in the context of economic demand and supply curves denoting that the demand for port services has two prices the price paid to the port by the users and the price or actual and opportunity costs incurred by port user carriers shippers and passengers presenting the economic theories of carriers shippers and passengers The numerous up to date references will be of benefit to students and researchers of the economics of the shipping trade to government officials in developing port and shipping policies and to port operators in understanding the port choice selection process by shipping lines and other carriers The Handbook of Maritime Economics and Business Costas Grammenos, 2013-07-04 This book is the founding title in the Grammenos Library The diversity of the subjects covered is unique and the results of research developed over many years are not only comprehensive but also have important implications on real life issues in maritime business The new edition covers a vast number of topics including Shipping Economics and Maritime Nexus International Seaborne Trade Economics of Shipping Market and Shipping Cycles Economics of Shipping Sectors Issues in Liner Shipping Economics of Maritime Safety and Seafaring Labour Market National and International Shipping Policies Aspects of Shipping Management and Operations Shipping Investment and Finance Port Economics and Management Aspects of International Logistics **International Handbook of Maritime Economics** Kevin Cullinane, 2011-01-01 This timely and comprehensive new Handbook brings together an unrivalled group of distinguished scholars and practitioners to provide in depth analysis and a contemporary perspective on a wide ranging array of topics in maritime economics Inherently global in nature the economics of the maritime sector has proved pivotal in facilitating globalization and international trade This Handbook offers a unique and indispensable source of reference and information for researchers students and practitioners interested in the relationship between these developments and maritime markets Ports and the Environment Meifeng Luo, Tsz Leung Yip, 2017-10-02 Ports are a vital part of the global economy connecting the world through maritime transport networks promoting international trade and supporting global economic growth However port communities are increasingly concerned about the local environmental problems associated with air pollution from increased port activities Efforts are increasingly being made into the reduction of human induced changes to the global environment and one of the target areas is to reduce air emissions from international shipping It appears that management of the port sector has entered into a new era not only because

environmental concerns are increasingly being expressed surrounding the ports themselves but also because many of the new environmental measures associated with the shipping trade have to be enforced when ships are in port Ports and the Environment assembles research focusing on the management of ports and the environmental issues associated with both the shipping trade and the ports themselves By examining contemporary concerns from the perspectives of maritime policy port management and industrial efficiency this book will be provide important reference for future research and policy making in this area This book was originally published as a special issue of Maritime Policy Management **ITF Round Tables**

Integration and Competition between Transport and Logistics Businesses International Transport Forum,2010-02-26 This International Transport Forum Round Table identifies critical competition issues and appropriate regulatory responses In particular it examines whether very large multinational transport and logistics firms escape regulatory oversight because of their sheer scale Handbook of International Trade and Transportation Bruce A. Blonigen,Wesley W. Wilson,2018-01-26

International trade has grown rapidly over the past half century accommodated by the transportation industry through concomitant growth and technological change But while the connection between transport and trade flows is clear the academic literature often looks at these two issues separately This Handbook is unique in pulling together the key insights of each field while highlighting what we know about their intersection and ideas for future research in this relatively unexamined but growing area of study **Railroad Economics** Scott Dennis,Wayne K Talley,2007-07-09 Research in

Sourdin,Richard W. T. Pomfret,2012-01-01 In the last decade trade costs have been a subject of intense study in the

international trade literature Richard Pomfret and Patricia Sourdin provide a timely and accessible summary of what we know so far Their comprehensive review of what we have learned is paired here with important new research in the area of trade facilitation This is important reading for policymakers interested in international trade and trade related economic development Russell Hillberry University of Melbourne Australia Few topics are as important in international economics as trade costs Surprisingly there are few studies that explicitly address that issue in detail This makes the book of great value to both professional economists and policy makers worldwide helping them to understand the different concepts of trade costs their determinants and how to reduce them using trade facilitation measures The book is very well written and a must read for any person that has an interest in trade costs Matthias Busse Ruhr University of Bochum Germany This up to date and informative book provides a comprehensive treatment of the costs of trading across borders and of trade facilitation policies While traditional tariff and non tariff barriers to trade have been reduced international trade continues to involve higher costs in money and time than domestic trade These include not only transport costs that are determined by distance and commodity characteristics but also at the border and behind the border costs which can be reduced by appropriate policies Research on trade costs has flourished since the turn of the century and this book by Patricia Sourdin and Richard Pomfret takes stock of our increased knowledge of the nature and magnitude of trade costs analysing why they are high and how they can be reduced to increase the gains from trade Trade Facilitation will appeal to economists and policymakers at the national level and in multinational institutions researchers and postgraduate students interested in international trade and trade policy as well as students in international business
