Doesn't Say Anna Bernard, Ziad Elmarsafy, Stuart Murray, 2015-08-11 This book reclaims postcolonial theory addressing

persistent limitations in the geographical disciplinary and methodological assumptions of its dominant formations. It emerges however from an investment in the future of postcolonial studies and a commitment to its basic premise namely that literature and culture are fundamental to the response to structures of colonial and imperial domination. To a certain extent postcolonial theory is a victim of its own success not least because of the institutionalization of the insights that it has enabled. Now that these insights no longer seem new it is hard to know what the field should address beyond its general commitments. Yet the renewal of popular anti imperial energies across the globe provides an important opportunity to reassert the political and theoretical value of the postcolonial as a comparative interdisciplinary and oppositional paradigm. This collection makes a claim for what postcolonial theory can say through the work of scholars articulating what it still cannot or will not say. It explores ideas that a more aesthetically sophisticated postcolonial theory might be able to address focusing on questions of visibility performance and literariness. Contributors highlight some of the shortcomings of current postcolonial theory in relation to contemporary political developments such as Zimbabwean land reform postcommunism and the economic rise of Asia. Finally they address the disciplinary geographical and methodological exclusions from postcolonial studies through a detailed focus on new disciplinary directions management studies international relations disaster studies overlooked locations and perspectives Palestine Weimar Germany the commons and the necessity of materialist analysis for understanding both the contemporary world and world literary systems.

The New Development Management Sadhvi Dar, Professor Bill Cooke, 2013-07-18 Development management is an idea that blends the seemingly innocuous claims of managerialism with notions of modernity and utopian ideals of third world progress This book views both phenomena as problematic and modernizing interventions In doing so it overturns and reclaims such ideas as participation community governance NGOs and civil society The contributors argue that the practices of development are often threaded together by the language of managerialism reports logframe encounters with the boss yet all of these serve to further development's disengagement from the mundane In voicing such concerns about the way development is going and about the encroachment of managerialism The New Development Management will breathe fresh life into post development debates

Rethinking Culture, Organization and Management Robert McMurray, Alison Pullen, 2020-03-11 The purpose of this book is to reimagine the concept of culture both as an analytical category and disciplinary practice of dominance marginalization and exclusion For decades culture has been perceived as a hot topic It has been written about and deployed as part of a search for excellence as a tool through which to categorise rank motivate and mould individuals as a part of an attempt to align individual and corporate goals as a driver of organizational change and as a servant of profit maximisation The women writers presented in this book offer a different take on culture they offer useful disruptions to mainstream conceptions of culture Joanne Martin and Mary Douglas provide multi dimensional holistic accounts of social relations that point up similarity and difference Rather than offering totalising or prescriptive models each author considers the complex polyphonic and processual nature of culture's while challenging us to acknowledge and work with ambiguity fluidity and disruption In this spirit writings of Judi Marshall Arlie Hochschild Kathy Ferguson Luce Irigaray and Donna Haraway are employed to disrupt extant management cultures that lionise the masculine and marginalise the concerns perspectives and contributions of women and the diversity of women These writers bring bodies emotions difference resistance and politics back to the centre stage of organizational theory and practice They open us up to the possibility of cultures suffused with multifarious potentiality rather than homogeneity and faux certainty As such they offer new ways of understanding and performing culture in management and organization This book will be relevant to students and researchers across business and management organizational studies critical management studies gender studies and sociology
