Oscar Niemeyer Buildings Alan Hess:

The Palm Springs School: Desert Modernism 1934-1975 Alan Hess, 2025-02-11 Palm Springs is at the center of a unique tradition in architecture marked by invention and a sensitivity to local conditions that has resulted in design that exerts an influence far greater than the town's small size. The book is the first to fully explore the wide ranging forms this architecture has taken from houses to gas stations hotels to airports banks to restaurants and spas. Much more than a resort destination Palm Springs has served as a laboratory of the Modern here so much architectural innovation and design took form. From the steel and glass boxes of Richard Neutra to the earthy organic homes of John Lautner and everything in between the solutions of architects and designers including notably William F Cody E Stewart Williams and Albert Frey were diverse and are ever more relevant in the face of contemporary challenges. Their answers addressed questions that still hold urgency: How to design sustainably in harsh climates. How to use technology efficiently and creatively to meet those challenges. How to build affordable and high quality mass produced housing. How to reflect a region's culture economy and distinctive atmosphere. Architects here responded to nature's climatological demands and Palm Springs became a center for innovations that were rooted in practice more than theory. Benefitting from the architectural freedoms offered by the remoteness of the California desert designers explored new approaches that we can now identify as central to the Palm Springs School shown here in rich archival and contemporary photography.

Oscar Niemeyer Buildings Alan Hess, 2009 With specially commissioned colour photography this is a re-evaluation of the great buildings of Oscar Niemeyer. These are the buildings Niemeyer himself considers his most important work including works in Brazil France Italy and Algeria.

Beyond the Supersquare Antonio Sergio Bessa, 2014-07-01 *Beyond the Supersquare* Art and Architecture in Latin America after Modernism which developed from a symposium presented by the Bronx Museum of the Arts in 2011 showcases original essays by distinguished Latin American architects historians and curators whose research examines architecture and urban design practices in the region during a significant period of the twentieth century. Drawing from the exuberant architectural projects of the 1940s to the 1960s as well as from critically engaged artistic practices of the present day the essays in this collection reveal how the heroic visions and utopian ideals popular in architectural discourse during the modernist era bore complicated legacies for Latin America the consequences of which are evident in the vastly uneven economic conditions and socially disparate societies found throughout the region today. The innovative contributions in this volume address how the modernist movement came into being in Latin America and compellingly explore how it continues to resonate in today's cultural discourse. *Beyond the Supersquare* takes themes traditionally examined within the strict field of urbanism and architecture and explores them against a broader range of disciplines including the global economy political science gender visual arts philosophy and urban planning. Containing a breadth of scholarship this book offers a compelling and distinctive view of contemporary life in Latin America. Among the topics explored are the circulation of national cultural identities through

architectural media the intersection of contemporary art and urban social politics and the recovery of canonically overlooked figures in art and architectural histories such as Lina Bo Bardi and Joao Filgueiras Lima Lele from Brazil Juan Legarreta of Mexico and Henry Klumb in Puerto Rico Modernism and American Mid-20th Century Sacred Architecture Anat Geva, 2018-10-08 Mid 20th century sacred architecture in America sought to bridge modernism with religion by abstracting cultural and faith traditions and pushing the envelope in the design of houses of worship Modern architects embraced the challenges of creating sacred spaces that incorporated liturgical changes evolving congregations modern architecture and innovations in building technology The book describes the unique context and design aspects of the departure from historicism and the renewal of heritage and traditions with ground breaking structural features deliberate optical effects and modern aesthetics The contributions from a pre eminent group of scholars and practitioners from the US Australia and Europe are based on original archival research historical documents and field visits to the buildings discussed Investigating how the authority of the divine was communicated through new forms of architectural design these examinations map the materiality of liturgical change and communal worship during the mid 20th century Casa Modernista Alan Hess, 2010 This is a comprehensive volume on modern residential architecture in Brazil featuring 40 houses Architects whose work is featured include Oscar Niemeyer Paulo Mendes da Rocha Affonso Eduardo Reidy Jorge Machado Moreira Juao Walter Toscano Abrahao Sanovicz Alvaro Vital Brazil and Rino Levi **Modern Brazil** Javier A.
