Our Inner Conflicts A Constructive Theory Of Neurosis:

Our Inner Conflicts Karen Horney,1992 Here Karen Horney develops a dynamic theory of neurosis centered on the basic conflict among attitudes of moving forward moving against and moving away from people Unlike Freud Horney does not regard neurosis as rooted in instinct In her words her theory is constructive because it allows us for the first time to tackle and resolve neurotic hopelessness Neurotic conflicts cannot be resolved by rational decision But they can be resolved by changing the conditions within the personality that brought them into being *Our inner conflicts* Karen Horney,1999

Handbook of Psychology, Clinical Psychology George Stricker,Thomas A. Widiger,2003-01-07 Includes established theories and cutting edge developments Presents the work of an international group of experts Presents the nature origin implications an future course of major unresolved issues in the area **Complex Interpersonal Conflict Behaviour** Evert Van der Vliert,2013-05-24 This book is about reactions to interpersonal conflict such as avoiding negotiating and fighting It breaks away from the prevailing assumption that conflict behaviours are mutually isolated reactions having mutually isolated effects Instead reactions are viewed as components of complex conflict behaviour that influence each other s impact on the substantive and relational outcomes The simultaneous and sequential occurrence of for example problem solving and fighting should therefore be studied together and not separately The author presents a ladder of stepwise increases in theoretical quality and designs the sequence of chapters in such a way that the theoretical value increases step by step The lower steps lead to the description of behavioural components and to a model of integrative and distributive dimensions The upper steps lead to the dimensions of dual concern for one s own and the other s goals and to complexity explanations in terms of the novel paradigm of conglomerated conflict behaviour The chapters are summarised into thirty four interrelated propositions Six empirical studies demonstrate the validity of crucial propositions at each level of the theoretical framework This monograph primarily reaches out to an academic readership However due to its clear structure its comprehensive propositions its frequent use of figures and its glossary the book will also provide an invaluable resource for any student and practitioner interested in conflict management and negotiation **Conversations with the Turtles** Nilson Ariel

Espino,2024-06-13 Polarization often results from deficient forms of social belonging caused primarily by stark social inequalities These inequalities then generate psychological responses that both create and worsen polarization Yet social stability is possible In this provocative and original book Nilson Ariel Espino argues that our current ideological polarizations can be best analysed as springing from the contradictions of modernity and its obsessions Using culture as a founding and organizing dimension the author disassembles the typical dichotomies of left versus right or conservatism versus

progressivism and reveals the opposing sides as mutually interdependent positions that struggle with cultural paradoxes they are ill suited to address Written with clarity and verve for the general reader this book brings classic concepts of cultural anthropology to bear on the key preoccupations of today's world from poverty and inequality to political instability and the environmental crisis
