The Seven Wonders of the Ancient World Bettany Hughes, 2024-01-18 A wondrous wonderful achievement. STEPHEN FRY Longlisted for The Anglo Hellenic League Runciman Award 2025. The Seven Wonders of the World were staggeringly audacious impositions on our planet. They were also brilliant adventures of the mind, test cases for the reaches of human imagination. Now only the Great Pyramid remains fully standing, yet the scale and majesty of these seven wonders still enthral us today. In a thrilling, colourful narrative enriched with the latest archaeological discoveries, bestselling historian Bettany Hughes walks through the landscapes of both ancient and modern times. This is a journey whose purpose is to ask why we wonder, why we create, why we choose to remember the wonder of others. She explores traces of the Wonders themselves and the traces they have left in history. A magisterial work of historical storytelling, *The Seven Wonders of the Ancient World* reinforces the exciting and nourishing notion that humans can make the impossible happen. Fantastic joy from the outset. PETER FRANKOPAN Fascinating, all told with Bettany's natural sense of wonder and adventure. SIMON SEBAG MONTEFIORE

Islam and World History Edmund Burke, Robert J. Mankin, 2018-11-05 Published in 1974, Marshall Hodgson's *The Venture of Islam* was a watershed moment in the study of Islam. By locating the history of Islamic societies in a global perspective, Hodgson challenged the orientalist paradigms that had stunted the development of Islamic studies and provided an alternative approach to world history. Edited by Edmund Burke III and Robert Mankin, *Islam and World History* explores the complexity of Hodgson's thought, the daring of his ideas, and the global context of his world historical insights. Among other themes, *Islam and World History* explores gender in Islam and the problem of Muslim universality. In our post-9/11 world, Hodgson's historical vision and moral engagement have never been more relevant. A towering achievement, *Islam and World History* will prove to be the definitive statement on Hodgson's relevance in the twenty-first century and will introduce his influential work to a new generation of readers.

Blockbusters and the Ancient World Chris Davies, 2019-03-21 Following the release of Ridley Scott's *Gladiator* in 2000, the ancient world epic has experienced a revival in studio and audience interest. Building on existing scholarship on the Cold War epics of the 1950s and 60s, including *Ben-Hur*, *Spartacus*, and *The Robe*, this original study explores the current cycle of ancient world epics in cinema within the social and political climate created by September 11th, 2001.

Examining films produced against the backdrop of the War on Terror and subsequent invasions of Iraq and Afghanistan this book assesses the relationship between mainstream cinema and American society through depictions of the ancient world conflict and faith Davies explores how these films evoke depictions of the Second World War the Vietnam War and the Western in portraying warfare in the ancient world as well as discussing the influence of genre hybridisation narration and reception theory He questions the extent to which ancient world epics utilise allegory analogy and allusion to parallel past and present in an industry often dictated by market forces Featuring analysis of Alexander Troy 300 Centurion The Eagle The Passion of the Christ and more this book offers new insight on the continued evolution of the ancient world epic in cinema

The Patchwork of World History in Texas High Schools Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States

Centre and Periphery in the Ancient World Michael J. Rowlands, Mogens Larsen, Kristian Kristiansen, 1987-10-22 This collaborative volume is concerned with long term social change Envisaging individual societies as interlinked and interdependent parts of a global social system the aim of the contributors is to determine the extent to which ancient societies were shaped over time by their incorporation in or resistance to the larger system Their particular concern is the dependent relationship between technically and socially more developed societies with a strong state ideology at the centre and the simpler societies that functioned principally as sources of raw materials and manpower on the periphery of the system The papers in the first part of the book are all concerned with political developments in the Ancient Near East and the notion of a regional system as a framework for analysis Part 2 examines the problems of conceptualising local societies as discrete centres of development in the context of both the Near East and prehistoric Europe during the second millennium BC Part 3 then presents a comprehensive analytical study of the Roman Empire as a single system showing how its component parts often relate to each other in uneven even contradictory ways
