Outsmarting Anger Joseph Shrand, Leigh Devine, 2013-03-18 The anger of others is often the roadblock to your achieving your goals Shrand reveals what happens inside the brain when the dark forces of anger begin to erupt He outlines techniques for recognizing the many forms of anger and tapping into your brain s powerful anger management zone

The Fear Reflex Joseph Shrand, Leigh Devine, 2014-10-07 Overcome underlying sources of fear and anxiety with the five proven techniques of Dr Joseph Shrand s I Maximum Approach Some fears are genetically wired Others begin in childhood or adolescence and may leave us feeling inadequate to face the dangerous unknown Dr Shrand a leading expert on the psychology of fear teaches us how to use the rational parts of our brain to change our perspective and respond rationally to fears as they present themselves Shrand s iMaximum resiliency based approach starts with the assumption that we re all doing the best we can with what we know at any given time Using this mindset as a foundation this model features five proven strategies to find better ways to connect with others to reduce fear transform fear into trust explore our biological responses to fear look at the role of social groups and society in fostering fear examine the role of fear in our childhood and home life By developing a radical self acceptance that allows us to step back and question our fearful thoughts we can confront and process them in healthier ways leading to a better more confident self

Do You Really Get Me? Joseph Shrand, 2015-09-08 Through his I Maximum Approach Dr Shrand helps readers learn how to set aside self doubt show others they are valued and make more meaningful connections Through his I Maximum Approach Dr Shrand helps readers learn how to set aside self doubt show others they are valued and make more meaningful connections In a sense we all try to be mind readers We theorize about whether we are admired or envied despised or loved Psychologists use the term Theory of Mind to describe our natural tendency to make assumptions about what others think and how they feel about us based on the tone of their voice facial expressions and body language These cues either signal us to open up further and make a connection or to put up a wall to protect ourselves from rejection

But it is also easy to misinterpret these cues and become unnecessarily guarded such as when someone appears to be angry with us and we later learn they were just having a bad day and the negative signs we were picking up really had nothing to do with us The more emotional baggage we bring to our interactions the more likely we are to negatively misinterpret other people's feelings and the more disconnected from them we become In this groundbreaking book Joseph Shrand MD instructor of psychiatry at Harvard Medical School and Leigh Devine teach us that by setting aside self doubt and assuming the best about ourselves and others we can make more meaningful connections based on mutual respect and value This is the heart of Dr Shrand's I Maximum Approach which teaches us to assume that we all are doing the best we can at any given time With the heightened empathy that we gain from this approach comes a deeper understanding of our own and others mental and emotional states and how they influence our interactions resulting in stronger connections and more rewarding relationships
