

Solutions to deforestation

We can limit deforestation and its effects.

Eat less meat and buy sustainable products

Reducing beef consumption by 20% could halve deforestation in the next 30 years. Purchasing sustainable products also minimizes deforestation.

Give indigenous people control of forests

Deforestation is more cost-efficient, and rates are 20% lower where Indigenous people are in charge of the land.

Regulate supply chains for sustainability

40% of tropical deforestation results from the trade of commodities. Making those supply chains sustainable will limit deforestation.

Sustainable forest management

Following a globally recognized certification standard like FSC helps promote sustainable forest management.

Forest Degradation and Management Gopal Shukla, Abha Manohar K., Anil Raj Kizha, Pankaj Panwar, Sumit Chakravarty, 2025-05-01 *Forest Degradation and Management An Indian Perspective* provides an overview of the dynamics and challenges surrounding forest degradation in India. It reveals the harmful impacts of human activity on natural resources, ecosystems, and communities, and emphasizes the urgent need for sustainable forest management practices. The book is divided into four parts, each offering a different perspective on forest degradation. Part I presents an overview of forest degradation in India, including a comparative analysis of assessment tools. Part II explores the ecological impacts of forest degradation on ecosystems. Part III is dedicated to societal aspects, examining the consequences of human activity such as cultivation, eco-tourism, resource utilization, and deforestation, while also analyzing the impact of forest degradation on forest-dependent communities. Part IV focuses on mitigation strategies, highlighting the role of protected areas, governance policies, and participatory approaches. This volume, within the book series *Forestry Sciences*, is an invaluable resource for students, researchers, policymakers, and conservationists seeking to tackle the complex challenges of forest degradation. It provides knowledge and practical insights to inform decision-making processes, guide sustainable forest management strategies, and promote responsible land use practices.
