Not A Drop To Drink:

Not a Drop to Drink Ken Midkiff, 2010-10-04 Water We can't live without it Not a Drop to Drink sounds the alarm detailing the current state of emergency facing the U S water supply From the parched High Plains to corporate boardrooms Ken Midkiff explores water wars privatization American agriculture and global warming And what we can do to get a glass of water **Prologue** ,2017

The Right(s) to Water Pierre Thielbörger, 2013-09-30 Politicians and diplomats have for many years proclaimed a human right to water as a solution to the global water crisis most recently in the 2010 UN General Assembly Resolution The human right to water and sanitation To what extent however can a right to water legally and philosophically exist and what difference to international law and politics can it make This question lies at the heart of this book The book's answer is to argue that a right to water exists under international law but in a more differentiated and multi level manner than previously recognised Rather than existing as a singular and comprehensive right the right to water should be understood as a composite right of different layers both deriving from separate rights to health life and an adequate standard of living and supported by an array of regional and national rights The author also examines the right at a conceptual level After disproving some of the theoretical objections to the category of socio economic rights generally and the concept of a right to water more specifically the manuscript develops an innovative approach towards the interplay of different rights to water among different legal orders The book argues for an approach to human rights including the right to water as international minimum standards using the right to water as a model case to demonstrate how multilevel human rights protection can function effectively The book also addresses a crucial last question how does one make an international right to water meaningful in practice The manuscript identifies three crucial criteria in order to strengthen such a composite derived right in practice independent monitoring enforcement towards the private sector and international realization The author examines to what extent these criteria are currently adhered to and suggests practical ways of how they could be better met in the future

The Language of Poetry John McRae, 1998 This accessible textbook is unique in offering students hands on practical experience of textual analysis focused on poetry It combines activities with texts commentaries and further activity suggestions

The Coming Storm Liam Fox, 2024-05-07 Following Russia's aggressive war in Ukraine the world is suddenly gripped by concerns over energy security And yet there is an even greater threat ahead one that is much more likely to shape the events of the twenty first century than the competition for oil or gas The combination of an ever increasing global population climate change industrialisation urbanisation and limited natural resources means that one difficulty above all will shape the political economic and security environment in the years ahead that is water If people and nations will fight for fossil fuels it is nothing compared to what they will do for the most vital natural resource of all As both a citizen who has supported water charities and worked in the NHS and a politician who has dealt with security and economic issues Liam Fox tells the story of water and the problems it presents in a more complete way than ever before The Coming

Storm unites a range of concerns that are often written about separately but seldom together and provides a comprehensible and compelling call for urgent action **Bridge Walker** Denise Gray Meehan,2016-09-30 A collection of essays inspired by morning walks on the Ponquogue Bridge in Hampton Bays The stories span the author s life from 7 to 70 Meehan s daily walks take her across Shinnecock Bay to the barrier beach and the ocean beyond Nature and life come together to stir remembrances of a life well lived *Ingxelo yenkqubo Ugunyaziwe Wamazwana Aseciskei* Ciskeian Territorial Authority,1970 Resources in Education ,1987 **No Citizens Here: Global Subjects and Participation in**

International Law René Urueña,2012-03-23 International legal scholarship has traditionally celebrated the possibility of individuals being considered as subjects of international law This book challenges that narrative and reveals hidden patterns in the way we think about legal subjects in global governance Building on the notion of a risk society this book argues that international law creates fragmented subjectivities whose conflicting identities help perpetuate a certain global loss of sense that is characteristic of our times An innovative contribution that draws on a wealth of international legal materials including human rights EU law international economic law and international organizations this book is useful to those with an interest in international legal theory new approaches to international law global constitutionalism and global administrative law
