Saddam Hussein Andrew Cockburn, Patrick

Cockburn,2002 The idea of direct invasion is the greatest threat to Saddam It avoids the problems of securing local allies inside and outside Iraq which bedevil any indirect approach to get rid of him But it has one immense disadvantage from the US point of view if the US invades Iraq to install its own government it will be taking direct physical control of an area containing more than half the world's oil reserves It will look like the founding of a new American empire based on physical force and will be deeply resented It would outrage the Arabs at a moment when the Israel Palestine conflict is in a particularly bloody phase America could find that it has overplayed its hand just as Saddam did when he invaded Kuwait twelve years ago From the new Prologue At the outset of the 1991 Gulf War US leaders resolved the Iraqis will pay the price so long as Saddam Hussein remained in power This book makes chillingly clear just how terrible that price has been Eleven years ago Saddam was caught by surprise his preparations since September 11 show that lessons have been learnt In a substantial new prologue the authors analyse these preparations and the terrifying consequences of a military invasion of Iraq

The Geographical Magazine ,1988-02 *International Journal of Wilderness* ,1995 *Kliatt Young Adult Paperback Book Guide* ,2004 *Lost in the Supermarket* Georgios Kyroglou,2024-12-17 Political consumerism refers to citizens use of boycotting and buycotting as they seek to influence political outcomes within the marketplace rather than through more traditional routes such as voting It is commonly understood as reflective of the progressively converging roles of the citizens and the consumers in late modernity In the aftermath of the Recession young people in particular are attempting to harness their individual consumer power to collectively express their political ethical and environmental considerations via their consumer choices The expansion of political consumerism among young people across several advanced liberal democracies has been theorised as a result of a wider cultural shift towards cosmopolitanism and postmaterialist value orientations and therefore as an outcome of affluence However the persistence of political consumerism as a preferred form of political participation among young people who were socialised under conditions of neoliberal austerity during and after the 2008 Global Financial Crisis calls for a re evaluation of these assumptions In particular given the susceptibility of political consumerism to a neoliberal modus operandi that attempts to commercialise citizenship itself the lack of literature problematising its emergence within a neoliberal socioeconomic context is indeed surprising This book addresses this gap by offering a detailed re evaluation of the underlying motivations values and identity orientations of young political consumers in a country of the European north United Kingdom as opposed to one of the European south Greece It will be of interest to academic specialists working in the areas of Political Sociology Youth Studies and Consumer Studies and scholars interested in political participation and political engagement
