Normal Training Child Classic Reprint:

The Normal Training of the Child (Classic Reprint) Madison Ashley Hart, 2018-01-11 Excerpt from The Normal Training of the Child The subject has three key words These will be used to unlock the doors into our house of study What we say will be directly related to these words education the child the Bible School It is not the province of this lecture to deal primarily and fundamentally with the educational problem And yet when we would talk or write suggestively and intelligently of the child and the child s relation to the school the thought of education becomes close vital and necessary We must also realize that the child was not made for the school but the school for the child And the natural and normal answer for the school s existence is for the purpose of education What then is the function of education Education says President Butler of Columbia is the adaptation of a person a self conscious being to environment and the development of capacity in a person to modify or control that environment It is first a matter of principles and second a matter of methods To prepare us for complete living is the function which education has to discharge About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Observations Upon the Natural History of Epidemic Diarrhoea (Classic Reprint) O. H. Peters, 2018-02-06 Excerpt from Observations Upon the Natural History of Epidemic Diarrhoea The causative agencies from which springs the plentiful harvest of child mortality in large cities may be conceived as a felted mass of rootlets almost inextricably intertwined Those of poverty bad housing bad feeding and neglect may be severally recognized but the extent of their interrelations with actual respiratory and alimentary disease those to which the greater part of the mortality is referred can be traced only with difficulty It is the object Of this work to aid in the labour of cutting away the matrix and entangling fibres and to lay bare the hidden ramifications of at least one important causative agency epidemic diarrhoea This affection if we accept provisionally the more novel and generally favoured conception As to its nature is revealed as something very like an ordinary infectious disease and one which permeates all classes while the excessive mortality it gathers round itself in urban centres must be regarded as something superadded owing to the vicious circle it forms with those baneful conditions of slum life mentioned above On the other hand its peculiarly intimate association with the circumstances of domestic life from the continual faecal pollution of the interior of the household by infants and others tends to make it more so than other affections of the kind peculiarly a class disease and an especial scourge of dirty neighbourhoods Dirty towns may however be saved from excessive mortality by a high percentage of breast feeding A notable point in the interesting comparison that can be drawn between diarrhoea and typhoid

fever is that in accordance with their peculiarly opposite age incidence curves the marked and habitual depositing of infectious excreta within the household in the former disease may make the question of water closet versus conservancy pan a matter of far less importance than in the latter About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Educational Differences (RLE Edu L)

Arthur Jensen, 2012-05-16 Among particular issues discussed in this book are the problems of the cultural disadvantaged the problems of devising psychological tests which are not biased towards any particular culture the problems of minority groups of children in education and the relationship between heritability and teachability *Routledge Library Editions: Education Mini-Set L Sociology of Education*
