Outward Appearance versus Inward Significance Aleksandra Hallmann, 2025-06-16 Clothes are often considered mundane yet they play a crucial role in people's lives beyond mere bodily protection The meaning of a piece of clothing changes the moment it is worn as it becomes associated with its wearer Because attire can demonstrate affiliation with a particular religious ethnic or political group it serves as an important means of constructing self identity and plays a vital role in social acculturation and assimilation To understand what clothing reveals about the ethnicity beliefs social rank profession gender or age of the wearer one must examine its sociocultural context and the nonverbal language it conveys This volume takes a multidisciplinary and comparative approach to dress studies in the ancient world Spanning a wide geographic spectrum from the Near East and North Africa to the Mediterranean world and the Americas it explores the cultural social and political significance of attire and engages the reader in a debate about the cross culturally developed role of dress in construing and projecting various identities Essays by experts from a range of disciplines including art history anthropology archaeology classics Near Eastern studies and conservation approach the subject from different perspectives apply varied methodologies and draw on a diverse array of primary sources including artifacts iconography and texts to offer a nuanced understanding of the clothed self in ancient societies This book will be of interest not only to experts in dress studies but to everyone interested in the cultural anthropology of dress and fashion **Wetland Archaeology and Beyond** Francesco Menotti, 2012-03-15 Wetland Archaeology and Beyond offers an appreciative study of the people and their artefacts who

occupied a large variety of worldwide wetland archaeological sites The volume also includes a comprehensive explanation of the processes involved in archaeological practice and theory

Hurcombe, 2014-04-24 Perishable Material Culture in Prehistory provides new approaches and integrates a broad range of data to address a neglected topic organic material in the prehistoric record Providing news ideas and connections and suggesting revisionist ways of thinking about broad themes in the past this book demonstrates the efficacy of an holistic approach by using examples and cases studies No other book covers such a broad range of organic materials from a social and object biography perspective or concentrates so fully on approaches to the missing components of prehistoric material culture This book will be an essential addition for those people wishing to understand better the nature and importance of organic materials as the missing majority of prehistoric material culture

Owen-Crocker, 2012 This volume continues the series tradition of bringing together work on clothing textiles from across Europe It has a strong focus on gold subjects include 6th century German burials containing sumptuous jewellery bands brocaded with gold the textual evidence for recycling such gold borders bands in the later Anglo Saxon period

Making Textiles in pre-Roman and Roman Times Margarita Gleba, Judit Pásztoókai-Szeőke, 2013-10-30 Textile production is an economic necessity that has confronted all societies in the past While most textiles were manufactured at a household level valued textiles were traded over long distances and these trade networks were influenced by raw material supply labour skills costs as well as by regional traditions This was true in the Mediterranean regions and Making Textiles in pre Roman and Roman times explores the abundant archaeological and written evidence to understand the typological and geographical diversity of textile commodities Beginning in the Iron Age the volume examines the foundations of the textile trade in Italy and the emergence of specialist textile production in Austria the impact of new Roman markets on regional traditions and the role that gender played in the production of textiles Trade networks from far beyond the frontiers of the Empire are traced whilst the role of specialized merchants dealing in particular types of garment and the influence of Roman collegia on how textiles were produced and distributed are explored Of these collegia that of the fullers appears to have been particularly influential at a local level and how cloth was cleaned and treated is examined in detail using archaeological evidence from Pompeii and provincial contexts to understand the processes behind this area of the textile trade

The Competition of Fibres Wolfram Schier, Susan Pollock, 2020-04-30 The central issues discussed in this new collected work in the highly successful ancient textiles series are the relationships between fiber resources and

availability on the one hand and the ways those resources were exploited to produce textiles on the other. Technological and economic practices, for example the strategies by which raw materials were acquired and prepared in the production of textiles, play a major role in the papers collected here. Contributions investigate the beginnings of wool use in western Asia and southeastern Europe. The importance of wool in considerations of early textiles is due to at least two factors. First, both wild as well as some domesticated sheep are characterized by a hairy rather than a woolly coat. This raises the question of when and where woolly sheep emerged, a question that has not up to now been resolvable by genetic or other biological analyses. Second, wool as a fiber has played a major role both economically and socially in both western Asian and European societies from as early as the 3rd millennium BCE in Mesopotamia and it continues to do so in different ways up to the modern day. Despite the importance of wool as a fiber resource, contributors demonstrate clearly that its development and use can only be properly addressed in the context of a consideration of other fibers, both plant and animal. Only within a framework that takes into account historically and regionally variable strategies of procurement, processing, and the products of different types of fibers is it possible to gain real insights into the changing roles played by fibers and textiles in the lives of people in different places and times in the past. With relatively rare, albeit sometimes spectacular exceptions, archaeological contexts offer only poor conditions of preservation for textiles. As a result, archaeologists are dependent on indirect or proxy indicators such as textile tools, e.g., loom weights, spindle whorls, and the analysis of faunal remains to explore a range of such proxies and methods by which they may be analyzed and evaluated in order to contribute to an understanding of fiber and textile production and use in the past.
