Ocr Gateway Chemistry Markscheme 2013:

Why Teach Philosophy in Schools? Jane Gatley, 2023-03-09 This book presents a case for teaching philosophy in schools It develops two original arguments for teaching philosophy to all students at some point over the course of their education Gatley argues that teaching philosophy is the best way to help students to think clearly using ordinary or non specialist concepts such as good truth or happiness She goes on to argue that teaching philosophy is the best way to help students to make sense of the different conceptual schemes used by different school subjects Combining these two arguments Gatley suggests that these two roles for philosophy are central to the task of educating people and so philosophy ought to be included on school curricula Building on the work of philosophers of education including Richard Stanley Peters Harry Brighouse Matthew Lipman Mary Midgley and Martha Nussbaum the book covers a range of topics including Philosophy for Children P4C the aims education religious education curriculum design and education policy **Science Education For Citizenship** Ratcliffe, Mary, Grace, Marcus, 2003-07-01 This is overwhelmingly a valuable book particularly in the context of science education in the UK It is a book that deserves to be read more widely by science teachers particularly those who seek not simply to extend their repertoire of teaching techniques but who wish to place these techniques upon a sound academic footing Educational Review I have greatly enjoyed reading through Science Education for Citizenship It is extremely informative and contains much of value We will definitely be putting it on our MA in Science Education reading list Dr Michael Reiss Institute of Education University of London This innovative book explores the effective teaching and learning of issues relating to the impact of science in society Research case studies are used to examine the advantages and problems as science teachers try new learning approaches including ethical analysis use of media reports peer group decision making discussions and community projects This book offers practical guidance in devising learning goals and suitable learning and assessment strategies helps teachers to provide students with the skills and understanding needed to address these multi faceted issues explores the nature and place of socio scientific issues in the curriculum and the support necessary for effective teaching Science Education for Citizenship supports science teachers citizenship teachers and other educators as they help students to develop the skills and understanding to deal with complex everyday issues **The Times Index**, 2003 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement The administration of examinations for 15-19 year olds in England Great Britain: Parliament: House of Commons: Education Committee, 2012-07-03 This report from the Education Committee looks at the administration of examinations for 15 19 year olds in England The Committee expresses serious concerns about incentives in the exam system and about competition on syllabus content Incentives in the system should be changed so the downward pressure through the competition of exam boards is mitigated The Committee considers a number of options to change incentives including i A single board This offers

a simpler system with no risk of competition but the Committee believes the cost risk and disruption outweigh the benefits ii Franchising of subjects to exam boards This removes syllabus competition but again has downsides 3 Or the current system of multiple boards The Committee sees no benefit in competition on syllabus content but the setting and marking of exams and associated administration if properly regulated could generate incentives and drive quality up offering value for money to schools and colleges The Committee also recommends the development of national syllabuses accredited by Ofqual The syllabuses would be developed by exam boards in conjunction with learned bodies and employer organisations and could therefore retain the benefits of competition on quality and the incentive for exam boards to innovate
